

Robert McKeirnan Joins Innovative Turbo Systems Keeping Them Steps Ahead Of Their Competition

Innovative Turbo Systems announced the addition of Robert (Mac) McKeirnan as the newest addition to the family. Mac will direct the team in innovating cutting edge technology for the future.

Simi Valley, CA ([PRWEB](#)) March 12, 2005 -- Innovative Turbo Systems announced the addition of Robert (Mac) McKeirnan as the newest addition to the family. Mac will direct the team in innovating cutting edge technology for the future. He furthermore will lead them in new product development and supervise the maintenance and development of existing product lines. His official title will be Vice President of Engineering and Chief Operating Officer.

"Mac is the ideal person to guide our engineering and operation departments, due to his extensive background in the development of advanced micro gas turbine technology," says Rick Head, Vice President of Sales and Marketing and CEO. "We are very excited to have him as a key player on our team. Innovative Turbo Systems is striving to improve the aftermarket automotive sector through continual improvement of advanced turbo machinery technology. The addition of this multifaceted resource, to an already impressive roster, positions Innovative Turbo to aggressively pursue our mission statement in becoming the premier supplier of state-of-the-art turbo machinery."

"After 11 years of substantial involvement with a \$260M start-up business, Innovative Turbo Systems, presented itself as a similar start-up company with a pivotal opportunity for technological and market presence," says Robert McKeirnan, Vice President of Engineering and COO of Innovative Turbo Systems. "Given the diverse view of an entrepreneurial startup environment, Innovative drew my excitement and interest in making a significant career change to become a contributing owner and assist in significantly expanding the company's growth."

Mac comes with a strong managerial background focusing on product design, development, material selection and all other facets of manufacturing supplemented with several US Patents to punctuate his technical background. Mac is a graduate of Loyola Marymount University in mechanical engineering.

Innovative Turbo Systems (ITS) provides simply the best in performance turbochargers, intercoolers, components, accessories, systems and service. Since ITS is made up of racers, it provides racers' insights into problem solving and product selection. The ITS team's competitive nature, technical expertise and hands-on approach drives it to develop innovative new products that outperform all others.
