

## **Auto Accident Photo's Are Worth 1000 Words**

*Insurance companies are now recommending a camera kit be available for use when involved in an auto accident. PhotoWitness auto kit is a must have in your glove box of your vehicle, boat, or RV. Be prepared! Help reduce fraudulent insurance claims, protect yourself, avoid higher insurance costs.*

([PRWEB](#)) March 13, 2005 -- Photo Witness is all you need, when you need it and is as close as your glove box! Auto insurance companies recommend keeping a camera in your glove box to use in the case of an accident. The Photo Witness kit contains a high quality camera with twelve exposure film, a notepad and pencil to take notes or exchange information, measuring tape and marking crayon. The pockets can be used to hold insurance cards and other necessary information such as roadside assistance numbers, etc. The kit includes its own high quality case to keep everything you need for accident reporting where you want it when you want it!

You are probably going to be in a car crash some time in your life. And if you are in your 20s, it'll probably be sooner rather than later. Really! No one wants to think about getting into an accident! We all know we are the worlds safest drivers! According to the National Highway Transportation Safety Administration, in 2004 there were an estimated 7.3 million police-reported motor vehicle traffic crashes - 46% percent of those resulted in injuries!

Our autokit can help protect you from someone falsifying a statement. Which could save you higher insurance premiums and your insurance company thousands of dollars! Careful as you may be, it is still inevitable that some idiot is going to be talking on his cell phone and will rear-end your precious vehicle. Face it, the accident is going to happen, so let's be prepared! The cost of protecting yourself is by far cheaper than not doing so! Insurance companies as well as attorneys will tell you "A picture and detailed information can be the deciding point in any litigation!"
