

## Road Rage - No Longer An Anti-Social Behavior

*Organizations and even government departments that are otherwise fairly respectable have fallen into the trap of wildly exaggerating hazards, alleging cases of road rage that are really nothing more than momentary impatience. They are describing as "antisocial" some common behaviors that most people are guilty of.*

Atlanta, GA ([PRWEB](#)) March 18, 2005 -- Organizations and even government departments that are otherwise fairly respectable have fallen into the trap of wildly exaggerating hazards, alleging cases of road rage that are really nothing more than momentary impatience. They are describing as "anti-social" some common behaviors that most people are guilty of.

AutoPlas is the maker of a patented innovation called Vehicle Courteous Message Display (VCMD) that gives a solution to being anti-social on the road. The Basic VCMD is program to say "Thanks", "Sorry", "Please", and "Help". The Advance unit will say what you want it to say, such as "Thank you for letting me over" or "Go Dolphins!" The unit is program not to accept offensive words, and is a big hit among small business owners who use it for advertising their business.

Mainly, it includes a small remote control and an electronic display panel. The small remote control may be placed in the desired location for easy access. Preprogrammed words, phrases, signs or combined messages are stored in a read/write memory section of the electronic display panel. It is easy to use. Messages may be displayed with the simple press of a button. The display panel may be mounted on/near the rearview window of an automobile.

About AutoPlas- AutoPlas Corp. (APC) is a privately owned Canadian company providing the manufacturing, distributing, and selling of its own patented innovation Vehicle Courteous Message Display (VCMD). APC headquarter is located in Windsor, Ontario, Canada, with sales, engineering, and quality assurance departments. Headed by a dynamic team of business professionals and engineers with extensive experiences in the automotive industry, APC accomplishes its goals by establishing sales and service network in North America. Its long-term goal is to become a reliable supplier of automotive accessory products in both USA and Canada.
