

UK Essex Business Leads with Trailers

A sceptical UK Truck and Trailer sales small business is now going from strength to strength after using handy4u's instant website builder services to create a small business website that has paid for itself for the next 5 years within the first few months of operation.

([PRWEB](#)) March 19, 2005 -- UK Essex based Burntwood Services had been supplying trucks and trailers to the haulage industry, and some original clients, for over 20 years. The owner of the business, Rob Wise, decided that he wanted to bring a new dimension to the business and looked sceptically into how the Internet might help him.

Fortunately, Rob discovered handy4u, the affordable UK small business instant website specialists, and although sceptical about the Internet he decided to use the straightforward handy4u system and give it a try for a few months.

Within weeks Rob started to receive enquiries for new business from a whole new section of potential customers that he would never have reached without a website, - and they've kept coming ever since.

Rob said "I'm not a computer man at all and so the handy4u service was just right for me as it was so easy and straightforward to use. I had my website on the Internet really quickly and I can change any or all of it when I like. With the business enquiries from it starting to flow almost straight away, the value for money of this service from handy4u is outstanding"

Rob's advice to other small business owners and entrepreneurs is "The Internet is an additional form of advertising, not a replacement, and people who don't think their business could benefit from it are making a big mistake. The younger generation of clients use the Internet to source all of their suppliers and I've been surprised by the number and range of potential customers that have contacted me from my website. Every small business owner and entrepreneur should try it for themselves" and with handy4u it wont cost you an arm and a leg to do so!"
