

New Product Rolled Out Nation Wide Called The Sun Patch

Sign Solutions LLC. is rolling out a new product nationwide called The Sun Patch (Patent Pending). Everyday millions of drivers are faced with driving directly in the strong glare of the sun. This problem is hazardous and a hassle all at the same time. The sun seems to seek you out where you can't get your sun visor to block it, and sun glasses can only do so much. The problem is that the car keeps changing directions and your visor can't cover all the angles to keep the sun out. The Sun Patch is a revolutionary product that improves your visibility while driving in the glaring sun

Waveland, MS ([PRWEB](http://www.prweb.com)) March 24, 2005 -- Sign Solutions LLC. is rolling out a new product nationwide called The Sun Patch (Patent Pending). Everyday millions of drivers are faced with driving directly in the strong glare of the sun. This problem is hazardous and a hassle all at the same time. The sun seems to seek you out where you can't get your sun visor to block it, and sun glasses can only do so much. The problem is that the car keeps changing directions and your visor can't cover all the angles to keep the sun out. The Sun Patch is a revolutionary product that improves your visibility while driving in the glaring sun. Once you use it, you will wonder how you lived without it. The Sun Patch requires no adhesive, because it works by static cling. You can move The Sun Patch any time and move it to where the sun is. Because your vehicle is constantly moving and changing directions, you need The Sun Patch to move with you.

The Sun Patch is sold under Sign Solutions, LLC. We are a research and development company that prides itself on being on the cutting edge of innovation. We have been incorporated since 2002 and have made great progress with a number of other projects. The Sun Patch came about by accident when my wife complained about the sun in her eyes when she went to work. The drive takes her directly in the sun when she drives east in the mornings and west in the evenings. This prompted us to look around for a solution, but nothing on the market solved the problem. We started working on different prototypes until we came up with The Sun Patch. I know we had the right solution when my wife made this statement: "I will not leave home without The Sun Patch". She loves it, and everybody we share it with loves it too. We even had a couple getting ready to fight over The Sun Patch while driving one day, because they had just one patch. Thank God we solved that problem, we got them several more, and maybe saved a marriage. Ha,ha. The product really works, and we think it can help not just the average driver, but bus drivers, truck drivers, airplane pilots, the whole transportation industry as a whole.

Available at the company's website (www.thesunpatch.com), The Sun Patch is priced affordably at \$7.00 ea. or two for \$12.00 (shipping included). The product will also be available for retail across the country in the summer and fall of 2005.
