

Philadelphia's Largest Transportation and Tour Operator, Philadelphia Trolley Works/76 Carriage Company, Expands Headquarters and Implements New Operational Software

Philadelphia's largest full service transportation and sightseeing tour operator, Philadelphia Trolley Works and 76 Carriage Company, expands to new, larger more modern headquarters and implements new Operational Software to help accommodate its rapid growth

Philadelphia, PA ([PRWEB](#)) April 2, 2005 -- The largest full service transportation and sightseeing tour operator in the Philadelphia area, 76 Carriage Company and its offspring, Philadelphia Trolley Works and Connective Tours, have expanded their share of the transportation marketplace by recently moving into a new 70,000 square foot facility which now houses their corporate office, as well as their operational and maintenance facilities.

Coinciding with the move, they have implemented the Distinctive Systems' Charter Booking System (CBS) as the operational software system of choice to manage their diverse fleet of over 50 vehicles. 76 Carriage Company purchased the Distinctive Systems CBS product from Distinctive's US distributor, Paradigm Technology Consulting, LLC (PTC) of Hamilton Square, NJ. CBS was chosen above all other software applications because of the ease of use of the application, as well as the incredibly short learning curve. Also of important consideration was the fact that CBS has the ability to handle a very rapidly growing company such as 76 Carriage Company and its affiliated companies.

"We are excited about our new larger headquarters, and we expect to keep growing which was one of our deciding factors that led us to the Distinctive Systems software, it offered the most scalability to keep up with our expansions and continued growth," said Michael Kates, Director of Operations for Philadelphia Trolley Works and 76 Carriage Company. "We focus on providing world class transportation service in the Philadelphia region. In addition to our full complement of transportation services we offer mechanical services ranging from complete overhauls, to preventative maintenance. Implementing our new software to manage the movement of our vehicles has allowed us to focus and grow other components of our business.

"We were delighted to be able to offer Philadelphia Trolley Works a system that allows them to meet their business needs today and grow with them to handle tomorrow's demands as well," said Bridgette Hobart-Janeczko, President of Paradigm Technology Consulting, LLC. "With the robust solutions offered by Distinctive, Philadelphia Trolley Works can continue to grow and to deliver superior service to their customers."
