

Automotive Website Unveils Free Online Car Leasing Guide for Consumers

LeaseGuide.com (leaseguide.com) announces the release of a comprehensive new online Car Leasing Guide for automotive consumers. It includes unique tools and data that gives car leasing consumers a real shopping advantage.

ATLANTA, GA ([PRWEB](#)) April 3, 2005 -- LeaseGuide.com (www.leaseguide.com) announces the release of a comprehensive new online Car Leasing Guide for automotive consumers. It includes unique tools and data that gives car leasing consumers a real shopping edge.

Approximately a quarter of all new cars are leased, yet most automotive consumers don't understand how leasing works. They often unknowingly agree to bad deals, unable to evaluate key factors. Others, who could potentially benefit from leasing, shy away. Armed with the Lease Guide, consumers can now level the playing field and lease with greater confidence.

LeaseGuide.com founder and president Al Hearn says, "With this new version of our website, we have simply responded to the growing demands of consumers to be better informed about car leasing. It's an area that has been begging for greater exposure, with little help coming from car dealers, manufacturers, or the government."
