

GreenHybrid.com Records 4 Millionth Mile of Real Hybrid Mileage Data

GreenHybrid is proud to announce the acquisition of 4 million miles in its Real Hybrid Mileage Database from over 300 automobiles. The system analyzes tank-by-tank information provided by its members. In addition to calculating fuel economy ratings for hybrid models, the database tracks the progress of individual cars.

([PRWEB](#)) April 6, 2005 -- GreenHybrid is proud to announce the acquisition of 4 million miles in its Real Hybrid Mileage Database from over 300 automobiles. The system analyzes tank-by-tank information provided by its members. In addition to calculating fuel economy ratings for hybrid models, the database tracks the progress of individual cars.

GreenHybrid is as an interactive online resource for hybrid electric vehicles. The website hosts an active discussion forum and a collection of related publications. Members are encouraged to contribute articles, tips and experiences for the benefit of enthusiasts and newcomers alike.

"Hybrids meet today's demands for more power and better fuel economy. If you haven't yet heard about this technology, you will," said Jason Siegel, creator of GreenHybrid. The automobiles, powered solely by gasoline, pair internal combustion engines with electric motors. The environmentally-friendly cars achieve increased performance and mileage over their non-hybrid counterparts.
