

Aplusb Software Corporation, Special Needs Application Developer, Releases 6 Languages Version of *US & Canada Driving Test*, Educational Tool for Prospective Driver.

*AplusB Software Corporation, leader in Road Safety Applications, announced the launch of Multilanguage *US & Canada Driving Test*, an Educational Tool for beginner and experienced driver.*

([PRWEB](#)) April 8, 2005 -- The *US & Canada Driving Test* (UPC 806494002854), is an Educational Tool for beginner drivers, travelers, children, people with learning disabilities, and foreign language learners. It increases confidence behind the wheel.

This interactive application prepares teenagers and new immigrants to pass official driver's license theory & road tests in every state/province. 51 states & 12 provinces have adopted slightly different road rules; therefore, it is a helpful application not only for new drivers but also for experienced drivers who travel or relocate from one coast to another.

Friendly interfaces, uncomplicated language, and a lot of graphics make the *US & Canada Driving Test* attractive for the entire family. Children 10 and up can play it like a game simultaneously learning road rules and signs; it improves their safety while cycling on crowded city streets.

The *US & Canada Driving Test* is offered in English, French, Spanish, Polish, German, and Russian, all on one CD-ROM. Hence, it can be used as a non conventional method to learn/practice foreign language.

Another purpose of this software could be to evaluate routine drivers and the same time reducing road accidents. Program contains many other features which are helpful in business, study, and pleasure. Who ever use it, feels more confident behind the wheel.

There is no software installation required and CD-ROM can be used on any computer with a Windows platform; application does not expire, can be updated from developer's website, who continuously works updating all necessary information, and is protected against copying.

Market research showed that there is a huge demand for this kind of product. Presently there exists not a similar one on the market. According to statistics, every year in North America more than 4 million people obtain their first driver's license and the computer is the most preferable/effective method of study. From the pricing point of view, this survival tool is accessible to people from all walks of life.

Some License Offices, Driving Schools, Libraries, and Colleges (public & private) in US and Canada already distribute this to the public.

Company's second major creation, the *Commercial Driver's License Manual* with all endorsements included, is an application for present and future commercial truck and bus drivers.

To see Demo please visit company web page www.aplusbsoftware.com.

Presently, Aplusb Software Corporation is developing an application dedicated to people with learning

disabilities willing to drive a car.

AplusB Software Corporation (D&B D-U-N-S #205560118), was initiated in 2002 and incorporated in 2003 as a "AplusB Software Corporation". Offering high-quality and low-cost educational software company increases road safety, decreases unemployment rate in rural areas, and helps people with learning difficulties.
