

## Factory Remotes For Cars

*City Lock of Boulder Colorado and [citylockusa.com](http://citylockusa.com) now are happy to offer OE Remotes for many domestic and imports autos.*

([PRWEB](http://PRWEB)) April 10, 2005 -- [citylockusa.com](http://citylockusa.com) has been offering security products on the web since 2000, and their brick-n-mortar store since 1979, under the same management. The goal of [citylockusa.com](http://citylockusa.com) is to fill in the void, for people who do not have a trusted, competent commercial locksmith to serve their needs, in their community.

Today, [citylockusa.com](http://citylockusa.com) is happy to announce that they are offering replacement remotes for many makes and models of cars, even ones the dealer does not have.

All remotes, unless specifically designated, are brand new, unused, original equipment ( O.E.M. ) product for that vehicle. Most remotes do not need special programming scan tools, though that is sometimes an option, if the OBP ( on-board programming ) feature in a car will not activate. Each remote will include instructions for programming. You need not search the web, and get conflicting instruction, or info that is outdated.

Replacing a remote with the correct replacement is easy, if our steps are followed. There are a lot of numbers on back of remote, but the same data can be on 3-5 different models! If your car has a trunk, you definitely want the new remote to not just unlock the door, but the trunk also. So [citylockusa.com](http://citylockusa.com) is working on inserting actual images of each different remote on their ecommerce site. All you need do, is match those numbers, match the image to your old remote, and you got a 99% likelihood of getting it right. In the event that the wrong remote is ordered, or [citylockusa.com](http://citylockusa.com) fills the order wrong, they will make it right! So, not only can you get transponder keys shipped to you, by sending in a worn out or broken one, along with your VIN number, now you can get remotes as well!

[Citylockusa.com](http://Citylockusa.com) understands that everyone has a website, and wants to sell what is on it. Customers looking for things, may not want what they find. Consider [citylockusa.com](http://citylockusa.com) as your personal locksmith. Virtually any security / access item desired. can be added to the [citylockusa.com](http://citylockusa.com) e-commerce site within one day. Ask for details.
