

## **Clubplug.net Fires on all Cylinders**

*The site offers a host of helpful tips and information while providing the consumer with an opportunity to purchase High Performance specialised spark plugs at very competitive prices.*

([PRWEB](#)) April 16, 2005 -- Clubplug.net is providing tremendous knowledge and savings to many "do-it-yourself" mechanics. Specialising in High Performance Spark Plugs, surfers are able to easily obtain the best spark plug technology at incredibly low prices.

Clubplug.net provides an easy and simple way to find and order the correct spark plug for your vehicle with its complete online spark plug cross-reference catalogue. In addition to these conversion tables, online spark plug images of used plugs are provided so that the "do it yourself" mechanic is able to visually compare his current plugs' performance. Frank Vessella, owner of the site, says, "People often don't have the technical capability to analyse engine performance and visual checks of spark plugs will often tell you so much about how your engine is running. A well maintained engine, through proper spark plugs, will not only prolong engine life but also help the environment."

In addition, Clubplug.net automotive racing fans with up to the minute news on all major racing organisations around the world.

"Being a 'do-it-yourself' mechanic myself as well as an avid race car enthusiast, I was always looking for a site which would contain practical and helpful information about racing and engine performance." That's when we decided to set up Clubplug.net."

The site offers a host of helpful tips and information while providing the consumer with an opportunity to purchase High Performance specialised spark plugs at very competitive prices.

For additional information contact Frank Vessella, (Owner), website [www.clubplug.net](http://www.clubplug.net).
