

AirportShuttles.com Brings a New Dimension to the Online Travel Industry

Consumers Are Now Able to Book a More Seamless Travel Package with the Launch of AirportShuttles.com

Sunrise, FL ([PRWEB](#)) April 21, 2005 -- AirportShuttles.com (www.airportshuttles.com), an online travel company, announced today that it will offer consumers an avenue to find the lowest rates on thousands of airport shuttles, limousines, sedans, buses, charter services, town cars and private vans.

AirportShuttles.com is the world's premier ground transportation consolidator. A technology driven company, AirportShuttles.com uses its patent pending reservation system to group together ground transportation companies on a nationwide basis. It allows consumers to book ground transportation to or from anywhere in the United States.

To date the major online travel companies offer mainly hotels, airfare, rental cars, and cruises. They either do not offer ground transportation at all or only offer it in a small capacity. The advent of AirportShuttles.com will offer the online consumer more options and a more complete travel experience.

"This will open up an avenue of online travel that has not really been tapped up until now. Online travel is on the rise, and ground transportation seems to have been overlooked thus far though it is an integral part of most travel," states Bryan Williamson, President and CEO of AirportShuttles.com. Williamson went on to say "Customers

often find that it can be very difficult to find an airport shuttle or limousine in an unfamiliar city, and sometimes even in their home town. AirportShuttles.com offers the knowledgeable consumer an opportunity to not only find transportation companies, but to compare them in order to make a more informed decision."

About AirportShuttles.com

AirportShuttles.com is a start-up company based out of Sunrise, FL. It was founded in 2003 by a six year veteran of the online travel industry.
