

New XL Extended Life Motor Oils From Amsoil

New car owners are more educated than they were required to be in the last generation. New lubricant options that meet and exceed the OEM specifications have also seen recent evolution.

([PRWEB](#)) April 24, 2005 -- AMSOIL INC. of Superior, Wisconsin, has introduced XL eXtended Life lubricants, a reformulated upgrade and modified name for its popular XL-7500 line. The new API certified XL series of synthetic motor oils have been designed to meet the new SM/GF-4 specifications. With enhanced thermal/oxidation stability, AMSOIL XL synthetic motor oils carry a 7500 mile / six month drain interval but also offer extended service life in vehicles equipped with oil life monitoring systems that advocate drain intervals longer than 7500 miles.

AMSOIL XL offers friction and heat reduction, as well as extreme temperature performance and unsurpassed fuel economy. AMSOIL XL synthetic motor oils are more resistant to deposits than conventional oils, heavily fortified with detergent/dispersant additives. XL protects against sludge, carbon and varnish formation that can clog oil passages thereby causing premature wear through lack of lubrication.

AMSOIL XL motor oil available in four viscosity grades, 5W-20, 5W-30, 10W-30 and 10W-40, and can be purchased in quarts, cases and larger bottles.
