

🗆 Wicked Storm 🗆 and 🗆 Wicked Warlock 🗆 Promise To Be Show Stoppers At Myrtle Beach Bike Rally Says Wicked Choppers

Myrtle Beach custom bike manufacturer plans to show three $\hat{A} \Box$ *hot bikes* $\hat{A} \Box$ *this year at annual Bike Rally.*

Myrtle Beach, SC (<u>PRWEB</u>) May 15, 2005 -- Wicked ChoppersÂ \square is creating quite a storm in Myrtle Beach, SC where some 300,000 people are expected to attend the annual Myrtle Beach Spring Rally, May 13 -24, 2005.

The $\hat{A} \square$ Storm, $\hat{A} \square$ a motorcycle enthusiasts like California Governor Arnold Schwarzenegger and NBC Talk Show Host Jay Leno would love to ride, will be on display with three other new Wicked Choppers $\hat{A} \square$.

The others are the $\hat{A} \square$ Monster $\hat{A} \square$ and the $\hat{A} \square$ Legend, $\hat{A} \square$ both of which will be test-driven in the Broadway Parking lot of the show. The Wicked Choppers semi trailer will feature the latest hot bikes and Miss 2005 Wicked Choppers $\hat{A} \square$ Jennifer West will autograph free posters.

Each custom chopper that Wicked Choppers builds is done so, with the owner in mind. $\hat{A} \square$ From the design, fabrication, engine and rear tire size, each part flows in harmony, $\hat{A} \square$ explained Chris Shoemaker, CEO Wicked Choppers $\hat{A} \square$.

 $\hat{A} \square$ We build $\hat{A} \square$ Wicked $\hat{A} \square$ custom motorcycles for those who do not want the run of the mill chopper. We will never copy another one of our bikes or someone else $\hat{A} \square$ s. Each Wicked Chopper is original. If you want your bike to look like all of the others, buy a Harley. If you want to be unique, buy a Wicked Chopper. $\hat{A} \square$

Wicked Choppers \Box Wicked Warlock won Best of Show at the Easyriders Louisville, KY bike show earlier this year. It too, will be on display. The Warlock, Legend and Storm all feature the unique custom made single side swing arm frame, which is a triangular piece that holds down the rear tire like a horseshoe tube.

"More and more Americans are riding custom motorcycles than ever. The popularity of owning and showing your custom chopper grows exponentially each year. To own what no one else has, is what drives this industry, $\hat{A} \square$ said Shoemaker, who has designed and supervised each custom motorcycle order for the past five years and who has witnessed the market climb.

Wicked ChoppersÂ \square is a certified motorcycle manufacturer, meaning that the custom motorcycles are insurable and can be financed. The custom choppers start at \$30,000.00 and are built based on each individual customerÂ \square s specifications. Most hot bikes are completed in three months or less.

Wicked ChoppersÂ \square services its bikes for free for the entire time of ownership. They carry a one-year limited manufactureÂ \square s warranty, and it services all manufactures warranties of the parts used on the bikes.

 $\hat{A} \square$ The Storm is our next showstopper, $\hat{A} \square$ said Shoemaker. $\hat{A} \square$ The Storm is smooth and flowing not sharp and ticked-off like some of our other choppers. We have spent a lot of time in the designing stages of this bike so that each time you look at it you $\hat{A} \square$ ll find something you never noticed before. $\hat{A} \square$

The $\hat{A} \square$ Best of Show $\hat{A} \square$ winner at the 2005 Easyriders Louisville, KY bike show is the $\hat{A} \square$ Wicked Warlock, $\hat{A} \square$ a soft tail Prostreet frame, custom-built for Wicked Choppers, +5 inches in backbone and -4 in the down tube. It includes: all two-inch steel tubing in the frame, an internal throttle and Wicked Choppers $\hat{A} \square$ own internal clutch with a custom cover. It also comes with the signature $\hat{A} \square$ W bars, $\hat{A} \square$ adjustable proportional valve, which is mounted under the transmission so that the foot break controls front and rear breaks.

TP show polished 107 with dual Webber Carburetors puts more than 112 HP on the huge 280-rear tire. Patented internal speedometer and tachometer are built into the gas tank and comes alive when you start the engine. Another feature includes a tail light and running lights hidden in the rear fender, along with many more hidden features.

Shoemaker said the $\hat{A} \square$ Wicked Legend $\hat{A} \square$ is $\hat{A} \square$ one of those custom bikes that started out as one bike but transformed into another over a couple of beers late one night in the shop.

"The Legend is a throw back to the old school choppers. We have the Springer front end; spoke wheels and the custom Wicked ape hanger bars, but with a twist. If you take a closer look at the Wicked Legend you will enjoy the new technology in a true $\hat{A} \square$ Legend. $\hat{A} \square \hat{A} \square$

There are more than two dozen different choices of Wicked ChoppersÂ \square menÂ \square s and womenÂ \square s apparel Online, which is made of the highest available quality materials and some, will be sold at the rally. Â \square The silks screens are double printed to reduce fading and the embroidery work is second to none,Â \square said Shoemaker.

 $\hat{A} \square$ Our Wicked Chopper hats and T-shirts are the hottest selling items. Our three-quarters sleeve baseball jersey is one of the hottest new items we carry. This form fitting cotton T shirt has our Wicked Choppers $\hat{A} \square$ Logo on a double silk screened on the front and the word Wicked printed on the back. $\hat{A} \square$
