

Crowson Tech's New BMP-3S Delivers "Stereo" Motion Effects for Home Theater

Designed to complement Crowson's TES 100 Couch Kit and A200 TES Stereo Amplifier, the BMP-3S (Stereo Bass Management Pre-Amplifier) delivers unprecedented steering capabilities for "stereo" motion effects. Watching a powerful stock car zoom from left to right across your display now means feeling the ground-quaking engine, racing from left to right in your seat.

Santa Barbara, CA (PRWEB) May 29, 2005 -- Maker of the TES 100 (Tactile Effects System) proudly announces the release of the hotly anticipated BMP-3S (Stereo Bass Management Pre-Amplifier).

Designed to complement Crowson's TES 100 Couch Kit and A200 TES Stereo Amplifier, the BMP-3S delivers unprecedented steering capabilities for "stereo" motion effects. Watching a powerful stock car zoom from left to right across your display now means FEELING the ground-quaking engine, racing from left to right in your seat!

The BMP-3S also features effective bass management, which allows enthusiasts to capture and sum up to 3-channels of bass information (L, R and LFE) to a discrete left and right output (regardless of the soundtrack format). The BMP-3S employs high quality line-level gain circuitry to ensure any amplifier can be used with the BMP-3S and TES 100 System. Additional features allow each user to further customize his/her experience: gain control and pre-amplification (-20 to +20dB), and a variable low-pass filter (500Hz to 20Hz).

BMP-3S (Stereo Bass Management Pre-Amplifier)
Specifications:

Size: L=4.8" x W=2.0" x H=3.6"
Inputs: RCA, unbalanced Left, Right and LFE
Outputs: RCA, unbalanced Left, Right and Mono
Controls: Low Pass Filter, 20Hz - 500Hz continuously variable
Gain: -20dB (min) to +20dB (max) continuously variable
Power: 12VDC 100mA (adaptor supplied)
Weight: 1.5lbs
Price: \$249
