

Pit Stop® is Looking For Leaders in The Trucking Industry to Protect The Environment, Comply with New Laws, and Care for Trucker Health

Equipping truck fleets with Pit Stop® makes good business sense. It's a time saving tool. It's a convenience to the drivers. It promotes good health. It protects the environment, and it helps ALL drivers comply with the current laws,"commented Mr. Nicassio.

Long Beach, CA ([PRWEB](#)) June 13, 2005 -- Joe Nicassio, Marketing Director for Pit Stop® Manufacturing, Inc. is looking for Progressive trucking companies to equip their entire fleets with Pit Stop® On-Board Urinal Systems."

"The State of Colorado just passed a law to fine \$500 for dumping human waste. Washington State just increased their fines from \$500 to \$1000. Other states have similar legislation in place. Pit Stop® makes it easy for drivers to comply with these new laws."

Mr. Nicassio continued, "Truckers are good people, however, they haven't had a good solution to this problem, until now. Let's face it, bathroom habits are an uncomfortable topic. Truck drivers have been "silently begging" to resolve this problem for years."

"We care about drivers, we are environmentally conscious, and Pit Stop® is trying to help trucking companys to be good stewards to the environment. Our goal at Pit Stop® is to set a new "standard" for every trucking company around the world."

Pit Stop® Gives Truckers "Peace of Mind".
