

World's Fastest Hummer (H1) is Currently being Completed by Predator Motor Sports in San Marcos California

A special conversion for the H1 and H2 Hummers, Duramax engines, Allison Transmissions air bag suspension FOR H1 AND H2 HUMMERS. These Hummers get between 18 and 21 miles per gallon and produce up to 1220 lbs. of torque. Long range and built to run anywhere. A true road warrior.

([PRWEB](#)) June 18, 2005 -- Predator has been contacted and is under contract with various official agencies overseas to build special high performance Hummers. Mr. Mark Robinson the Director of Marketing has stated these Hummers are the best vehicles to hit the market since the Hummer itself. We build these vehicles in three platforms 350 horsepower 450 horsepower and 520 horsepower. They are built for durability, long range, comfort with power to spare when needed. With the extended mileage well over what the H1 and H2 come with, along with a tremendous increase in torque we believe the conversion is a must consideration for companies doing security cars, state cars, high profile cars, and for those who seek the best of the best in the Hummer world.

For those interested in further details please contact Mark Robinson at Predator Motor Sports.
