

Top-notch Performance Headers now on sale at Inner Auto

Headers are one of the easiest bolt-on accessories you can use to improve an engine's performance. Boost performance and drivability in your vehicle with high quality, durable Inner Auto Headers Exhaust.

([PRWEB](#)) July 17, 2005 -- Are you tired of your engine's performance? Headers are one of the easiest bolt-on accessories you can use to improve an engine's performance.

Headers make it easier for the engine to push exhaust gases out of the cylinders. The idea behind an exhaust header is to eliminate the manifold's backpressure. Each cylinder gets its own exhaust pipe, instead of a common manifold that all of the cylinders share.

Boost performance and drivability in your vehicle with high quality, durable Inner Auto Headers Exhaust. Mileage will improve as your engine becomes more fuel-efficient. The outstanding features built into every Mercedes Benz Headers Exhaust of Inner Auto delivers the ultimate in quality and performance. High-grade bolts and washers, top quality gaskets made to Hooker's specifications, adapters, extensions and brackets are included in the package. It includes all hardware plus instructions for a direct fit, trouble-free installation.

Do not let your exhaust rob your engine of power. Inner Auto's High performance Mercedes Benz Headers Exhaust systems use headers; big tail pipes and free-flowing mufflers to eliminate backpressure in your vehicles' exhaust system. Inner Auto's unbeatable price on Mercedes Benz headers exhaust is the envy of competitors. No wonder our repeat customers keep coming. Right now you are in the exact website that our satisfied customers have gone into. We have our secured online store to choose your needed headed exhaust from.

Our extensive master catalogs show Header fitting detail and notes as they relate to specific applications to help you determine what is fit for your vehicles. These includes power steering, power brakes, EGR, Air Conditioning, ports, tube size, collector size, collector length, port shape, emission codes, header finish etc.
