

Maximizing Horsepower Made Easy: British Customs Releases Performance Exhaust Weekend Project Packages for Triumph Modern Classics

British Customs releases complete engine performance upgrades Weekend Projects packages for Triumph Street Twin, Bonneville T120, Bonneville T100, Thruxton 900, Bonneville Mag, and more.

Los Angeles, CA ([PRWEB](#)) November 10, 2016 -- Upgrading a motorcycle's exhaust is perhaps the most quintessential upgrade known to motorcycle enthusiasts. What rider doesn't want to get everything they can from their engine and make their bike sound great in the process? But upgrading performance isn't always just a matter of pulling off the old mufflers and replacing them with shiny new ones: the best results come from taking a holistic approach to maximize engine performance by installing an air box removal kit, an air injection removal kit, and upgrading the fuel management system with either a piggyback ECU or upgraded carb jets along with the muffler. However, each motorcycle's needs vary from model to model, which has caused significant frustration and confusion among riders who seek to customize their own motorcycle themselves.

To eliminate the guesswork and frustration from upgrading motorcycle exhaust, [British Customs](#) has released Performance [Weekend Projects](#) packages containing everything a rider needs to install a new exhaust system on their Triumph modern classic. A Performance Weekend Project upgrade package from British Customs includes either a pair of slip-on mufflers or a full exhaust system, an air box removal kit, an air injection removal kit, and either a Dynojet Power Commander V or the appropriate carburetor jet kit depending on the model motorcycle. This ensures that a motorcycle will run properly with its new exhaust system by fully and correctly replacing all the parts that need to be upgraded in order for the engine to accommodate for its increased performance demands.

The upgrades contained in Weekend Project packages can all be installed using only common tools and do not require anything more than basic technical knowledge to install. They also allow riders to transform their motorcycle into a variety of [authentic retro styles](#), including cafe racers, trackers, scramblers, desert sleds, bobbers, hot rods, resto-mods, and more. Each part in a Weekend Project package takes its cues from the rich heritage of 60s and 70s Triumph motorcycles to help riders achieve a truly custom vintage look on their modern classic.

To complement the release of their revolutionary new line of performance exhaust slip-ons, British Customs released Weekend Project packages designed to help riders get the state-of-the-art exhaust with Predator Pro, Sleeper Pro, and Performance Tip mufflers. These packages are tailored for the Triumph Bonneville T100, Thruxton 900, Bonneville Mag, Bonneville T120, Street Twin, and Thruxton 1200 model motorcycles.

[Weekend Projects](#) are offered for every section of a motorcycle, including seat packages to improve the bike's appearance, controls packages to improve ergonomics, lighting packages to relocate turn signals, performance packages to completely upgrade the exhaust system, and soon-to-be-unveiled maintenance packages. With Weekend Projects, a rider can easily transform his or her Triumph motorcycle in a single sitting.

To support the riders who are inspired to build their own custom motorcycle, British Customs created an expansive [Resource Center](#) where they have a continually growing list of curated installation instructions, how-to guides, buyer's guides, and Motorcycle 101 guides. Each guide is rated by difficulty, lists what tools are required, how long an installation takes, and for what models the guide works. The British Customs Resource

Center is designed to help riders ranging from new first time owners to experienced custom builders learn how to customize, work on, and maintain their Triumph and Ducati motorcycles. Users can also leave questions or comments on articles in the Resource Center, where British Customs experts or other community members can respond to support each other.

About British Customs:

British Customs is a Southern California-based lifestyle brand and designer of aftermarket motorcycle parts. They are known for making the highest quality factory-spec bolt-on parts that only require common tools and minimal technical knowledge to install. With any of their parts upgrades, the average rider can completely customize his or her motorcycle in a weekend.

Disclosure:

Performance products are not for sale in California or any other state that it is not legally permissible and use is restricted. The California Air Resources Board (CARB) and other agencies regulate motorcycle aftermarket parts that have the potential to impact emissions. In most cases, the sale and use of emissions related to aftermarket parts on motorcycles is prohibited unless it is either a “replacement part” or for closed course competition use only as defined by California, or is a specifically authorized use of that part as reflected in an Executive Order (“EO Part.”). Any order constitutes Buyers offer and Sellers acceptance of the Terms and Conditions stated here upon purchase or acceptance.
