

From Wings to Wheels Â Leading Ticket Provider Launches Airport Transfer and Car Scheme

Discount airfare provider Faremax, Inc. has recently diversified from offering great-value deals on worldwide airfares and will offer New York City airport transfers and Car Services.

Marlboro, N.J. ([PRWEB](http://www.prweb.com)) July 21, 2005 -- Major discount airfare provider Faremax, Inc. has recently diversified from offering great-value deals on worldwide airfares. From now on, travelers departing from or arriving at New York's airports can have their transfers arranged by Faremax (http://www.faremax.com/airport_transfers.aspx) -- spelling the end of uncertainty over cab reliability, availability and pricing. Travelers who book their transfers to or from JFK, Newark or LaGuardia through Faremax can rest assured that their driver knows the way, won't overcharge, and will get them where they need to be on time.

In addition to the airport transfer scheme, Faremax are also offering a car and limo service in the New York City and Tri-State area -- so travelers can make their way across the metropolis in comfort and style.

"Demand has been growing for a 'joined-up' service for a while," says Faremax CEO Ilya Epshteyn. "Our experience is that travelers, before or after a long flight, don't want the hassle of organizing transfers on the spot -- they want a trusted, reliable, predictable and personalized service. That's what we're offering. We're also pleased to announce that special deals are available for customers who book both flights and transfers using our service."

faremax.com is a leading vendor of discounted leisure travel products, offering consumers affordable one-stop shopping for all of their travel needs. The company offers consumers one of the largest collections of discounted airfares (ten million unpublished fares offered on more than 600 major airlines), car rentals and hotel accommodations in the industry.
