

Meta-Cog Releases AutoTech 3.0 - Automotive Troubleshooting CD-ROM Helps Average Folks Find Out What's Wrong with their Car Before Visiting an Auto Repair Shop

AutoTech helps people avoid auto repair rip-offs. Anyone can now easily troubleshoot common car problems by answering a few simple yes/no questions. Covers 600 models.

Los Angeles, CA (PRWEB) July 26, 2005 -- Meta-Cog Software (www.metacog.com) has released AutoTech 3.0, software that tells car owners what's wrong with their vehicle before visiting their local auto repair garage. Average folks (ie. non-mechanics) can now troubleshoot common car problems by answering simple yes/no questions. No auto repair knowledge is required to use AutoTech.

AutoTech provides a diagnosis along with a plain-English explanation of the diagnosis. It then offers advice as to what repairs are needed to fix the problem. Any person can become more informed before visiting the auto repair shop.

AutoTech's troubleshooting ability is based on the knowledge of numerous ASE certified auto repair experts. Consultations flow in a human-like conversational manner thanks to AutoTech's use of artificial intelligence technology. AutoTech gives a person the straight story before going to their local auto repair shop.

- Easily diagnose car problems by answering simple yes/no questions
- Covers all problem areas (Engine, Starting, Brakes, Drivetrain, Starting, Suspension, Steering, Accessories)
