

Motorcycle Touring Aftermarket Product Reviews is Now Accepting Advertising

CHM Associates have been doing product evaluations since 1995 and have compiled most of them on this website that is kept current.

Colorado Springs, CO ([PRWEB](#)) December 12, 2005 -- CHM Associates have been doing product evaluations since 1995 for a Touring magazine and have now compiled most of them on this website. CHM Associates are continuing with new evaluations and writing product reviews as well as updating existing product reviews. This is a free website and they don't charge a fee to do product reviews. CHM Associates are now accepting advertising in its own section on the website even if they don't write a review for the advertisers. They also except News Releases and consider them as advertising. CHM Associates (Gold Wing Motorcycle Aftermarket Product Reviews) can be contacted by going to the website and clicking on the link Button: Contact Mark & Carm (e-mail protected from spam bots). Their rates are very simple. Each ad or news release will run for twelve (12) consecutive months and can be changed or replaced at any time for a fee of \$50 per change. They offer only two (2) size ads in either black & white or color for the same prices. A full page ad will cost \$1,200.00 per year and a half page ad will cost \$700.00 per year. The reason for taking advertising is to help defray the expenses of owning the website. Mark & Carm also welcome comments from the readers about their opinions on the products they have reviewed, or products that the readers of this website would like to see reviewed by them, including differences or agreements of opinions. If a manufacturer would have a product that they would like to see reviewed by them and posted on this website, please contact them. For a short period of time, they are running an introductory price. To find out about the introductory offer, please contact them. Mark & Carm are Goldwing motorcycle touring riders and have owned five (5) Goldwings. They were also the National Rider Education Directors for a national association in the past. Some of their product reviews are for safety related products for motorcyclists. A lot of products they review are exclusively used on Goldwings but a lot of them can be used on any motorcycle, ATV, Snowmobiles, etc.
