

## **Petrol Prices Flat Despite Oil Depot Fires**

Prices for 4 star (LRP), unleaded and diesel all remained flat over the weekend despite the huge fires which have been burning at the Buncefield oil depot in Hemel Hempstead.

(<u>PRWEB</u>) December 13, 2005 -- Prices for 4 star (LRP), unleaded and diesel all remained flat over the weekend despite the huge fires which have been burning at the Buncefield oil depot in Hemel Hempstead.

Buncefield is the country's fifth largest fuel distribution depot, jointly run by Total and Texaco, and is used to store oil, petrol and kerosene. It had been feared that the loss of the Buncefield depot may have caused some supply problems, but this has not been the case.

According to fuel price monitoring website <u>www.petrolprices.com</u>, prices actually fell marginally on Sunday, with the average price of Unleaded down 0.1p/litre to 87.60p and Diesel down 0.3p/litre to 91.99p

The news came as fire-fighters were given the go-ahead to attempt to extinguish the blaze, which is believed to be one of the biggest in peacetime Europe.

Commenting on the announcement, Paul Maunders, co-founder of PetrolPrices.com said, "The oil industry is incredibly resilient. They have plans in place to deal with supply problems like this. The price statistics from <u>www.petrolprices.com</u> today would confirm that their plans are working and that the disruption has been minimal."

The advice from the industry is for motorists to buy petrol when they normally would and not to panic buy. Nick Vandervell, from the UK Petroleum Industry Association said, "Since Buncefield only accounted for around 5% of total distribution capacity, it is the act of panic buying itself which is most likely to cause shortages, and not supply problems from the depots."

## Notes for Editors

Petrolprices.com is the UK's only comprehensive and free fuel price website for consumers, where they can find the cheapest petrol stations near any town or postcode of their choice. Prices are updated daily and displayed conveniently using Google Maps technology.

At the time of writing the difference between the highest price (104.9p) and the lowest price (83.9p) for unleaded petrol in the UK was 21p.

Petrolprices.com was launched in November 2005 by Fubra Limited, the same company that launched the largest UK house price website <u>www.ourproperty.co.uk</u> in January of this year.
