

## **It's About Time! The new HUMMER SCOPE brings real night vision to outdoor and adventure enthusiasts.**

*The new HUMMER® SCOPE, produced by Richardson, Texas-based Delft Electronic Products, Inc., is a hand-held monocular touted as "real" night vision for the crowded and confusing night vision market. "Our partnership with HUMMER® has enabled us to bring much-needed quality, clarity and credibility to a market that is too often dominated by peddlers of cheap imitation night vision gear. We are excited that the consumer will finally be able to own a quality piece of real night vision gear", said Jon Goodwin, President of DEP, Inc.*

Richardson, TX ([PRWEB](#)) August 1, 2005 -- Designed for rugged use by quality-conscious customers, the unit features new, high quality image intensifier tubes produced by Photonis-DEP, a global leader in high-end image tube production. The image intensifier is the component that enables the user to literally see in near total darkness. The housing is produced by Mansfield, Texas-based Yukon Optics, a leader in night vision system production. The device is available at HUMMER® dealers nationwide, and select retailers and websites.

"HUMMER has successfully built has a strong identity associated with rugged quality and reliability. DEP and Yukon have united to capture the essence of the HUMMER trademark in a night vision device that will appeal to consumers who demand characteristic HUMMER features", said Goodwin.

### **About DEP**

DEP, Inc. is the U.S. affiliate of Photonis-DEP, B.V. With manufacturing operations in The Netherlands and France employing over 800 people, Photonis-DEP is a leading developer and supplier of high-end image intensifiers, low light level detectors and photon counters.
