# Automotive & Transportation Technology Innovators Honored in Third Annual AutoTech Breakthrough Awards Program

*Prestigious Annual Awards Program Recognizes Innovation in Automotive and Transportation Technologies Around the Globe*

LOS ANGELES (PRWEB) October 13, 2022 -- AutoTech Breakthrough, a leading market intelligence organization that recognizes the top companies, technologies and products in the global automotive and transportation technology markets, today announced the winners of its third annual AutoTech Breakthrough Awards program, representing the best in next-generation transportation technology solutions around the world.

The mission of the annual AutoTech Breakthrough Awards program is to conduct the industry's most comprehensive analysis and evaluation of automotive and transportation technology categories, including Connected Car, Electric Vehicles, Engine Tech, Automotive CyberSecurity, Sensor Technology, Traffic Tech and many more. This year's program attracted more than 1,500 nominations from over 15 different countries throughout the world.

"The global transportation industry is predicted to reach a value of $7.8 trillion by 2027. As this industry grows, innovative technology will be necessary to help solve pressing issues such as traffic congestion, delivery costs, unpredictable travel patterns, and more in order for transportation to work more efficiently and react to real-time changes in conditions," said Bryan Vaughn, Managing Director of AutoTech Breakthrough Awards. "As the automotive and transportation industry rapidly evolves, new breakthrough technology will literally 'drive' the revolution. The future of transportation is electrified, autonomous, shared, and connected, and this years' AutoTech Breakthrough Award winners represent the best in these new technologies. We are thrilled to recognize our breakthrough automotive and transportation technology innovators in our 2022 awards program."

AutoTech Breakthrough Award winners were evaluated by an independent panel of judges within the automotive space. The winning products and companies were selected based on a variety of criteria, including most innovative and technologically advanced products and services.
