

BOOSTER SEAT INSTALLATION CHECKLIST

- Get the right car seat** for your child's age, weight, **and** height.
- Register your booster seat right away** so you can be notified if there's a safety recall.
www.safercar.gov/parents/Car-Seat-Recalls-Registration.htm
- Read the instructions** for both your vehicle **and** your booster seat.
- Install your car seat correctly** in the back seat, facing forward, with a **lap and shoulder belt** for your child—never with just a lap belt only.

Secure your child correctly in the booster seat, every time.

High-back boosters:

Make sure:

- Your child's back is flat against the back of the booster seat.
- The lap belt portion of the seat belt is under the booster seat's arm.
- You use the shoulder belt positioners that are provided with the booster seat—to keep the shoulder belt in place.

Backless boosters:

Make sure:

- You use it in a vehicle seat that has a head restraint (head rest).
- Your child's back is flat against your vehicle's back seat.
- The lap belt portion of the seat belt is under the booster seat's arm.
- The shoulder belt portion of the seat belt is positioned according to your booster seat's instructions.

Double-check the fit.

- The lap belt must lie snugly across the upper thighs, not the stomach.
 - You may need to pull up on the shoulder belt to tighten the lap belt.
- The shoulder belt should lie snug across the shoulder and chest and not cross the neck or face.
