DEFECT NOTICE UNDER 49 CFR Part 573 – AMMENDMENT (recall #12V-427)
Mobilityworks Vehicles with Braun Lifts

Dear Mr. Ansley:

Upon receipt of the 573 approval notification I recognized an error in reporting. I interpreted the question on number of units affect as the total number of units produced during this time frame and reported the wrong number of “AFFECTED” units. I respectfully request to amend the original 573 submission as follows:

- Potential number of Units Affected: **1,219**
- Percentage of vehicles estimated to contain the Braun component defect is **1,219** or **100%**.

I apologize for the error in reporting and appreciate you adding this amendment to the original 573 submission.

Respectfully submitted,

Mobilityworks
Dennis Summers
Vice President
