# UNITED STATES PATENT OFFICE.

HOWARD C. TYLER, OF PHILADELPHIA, PENNSYLVANIA, ASSIGNOR OF  
THREE-FOURTHS TO RULIEF P. SMOCK, HUBBARD F. WEEKS, AND  
FRANK C. DU BOIS, OF FREEHOLD, NEW JERSEY.

## DESIGN FOR A CORE FOR VEHICLE-TIRES.

SPECIFICATION forming part of Design No. 32,542, dated April 17, 1900.

Application filed March 8, 1900. Serial No. 7,933. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, HOWARD C. TYLER, a citizen of the United States, residing in the city and county of Philadelphia, State of Pennsylvania, have invented and produced a new and original Design for Cores for Vehicle-Tires, of which the following is a specification, reference being had to the accompanying drawings, forming part thereof.

The leading feature of my design for the core of a vehicle-tire is, first, a series of channels in the periphery of the core, producing the effect of a cross-shaped figure, and, next, a channel in the center of the core, with wings radiating therefrom.

Figure 1 represents a perspective view of a portion of a core embodying my design. Fig. 2 represents a transverse section thereof.

In the drawings, A designates a portion of

a core of a vehicle-tire. In the periphery B of said core are the channels C C C C, with limbs D D D D between the same, producing the effect in transverse section of a cross-shaped figure.

E designates a channel in the center of the core, the same having wings F radiating therefrom, said wings entering the limbs D and alternating with the channels C.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for the core of a vehicle-tire substantially as shown and described.

HOWARD C. TYLER.
