

Case 506 : Narrative

Case Vehicle (A): 2005 Jaguar
Type: X-Type, 4-door sedan
Driver: 25-year-old male
CDC: 12-FCEN-2

SITUATION

[1](#) [2](#) It was daylight, the sky was clear, and the asphalt surface of the four-leg intersection in a business district was dry. The east and south legs of the intersection are private roads with stop signs. The north and west legs are two-way two-lane roads with posted speed limits of 25 mph (40 kph). The southbound lane of the north-south road is equipped with a yield sign and traffic is directed only to the west with a private driver to the east. [3](#) Case vehicle (A) was traveling south at an unknown speed in the southbound lane and was approaching the intersection. [4](#) Upon reaching the intersection, the intoxicated male driver began to make a right turn to travel west but he lost control of the vehicle. [5](#) [6](#) [7](#) Case vehicle (A) crossed the eastbound and westbound lanes and went over the curb as it departed the left side of the road, and the front end struck a 25-cm diameter tree located 2-meters south and 12-meters west of the intersection. The vehicle came to rest against the tree, facing southwest, and was towed from the scene due to damage.

The police accident report (PAR) indicates B-level injuries for the driver and right-front passenger, but they did not sustain any injuries and did not receive any medical treatment. The PAR indicates A-level injuries for the center-rear adult female passenger who was transported to a level-one trauma facility and hospitalized for six days. The driver's blood alcohol level was .11 percent.

GENERAL VEHICLE DAMAGE AND ESTIMATED CRASH SEVERITIES

[8](#) [9](#) Damage to the front of case vehicle (A) was moderate to severe and was confined primarily to the center portion. [10](#) Direct damage began 5-cm to the left of center and extended 24-cm to the right. [11](#) The maximum rearward crush was 49 cm and it occurred near the vehicle centerline at bumper level.

[12](#) [13](#) [14](#) [15](#) [16](#) Using the barrier algorithm of the WinSMASH crash-reconstruction program and a crush profile measured at the bumper level for case vehicle (A), the following impact severity was estimated for the frontal impact with the tree:

		Estimated Velocity Change - kph (mph)		
Vehicle	Variable	Estimated Velocity Change - kph (mph)	Total	Longitudinal
Latitudinal	Case Vehicle (A)	delta V	33 (20)	-33 (-20)

DESCRIPTION OF DAMAGE TO CASE VEHICLE (A)

Exterior

[17](#) [18](#) [19](#) In the front, the center of the bumper was crushed rearward, which pulled the left and right bumper corners inward. The bumper-reinforcement bar was crushed rearward into the engine compartment and radiator. Personnel at the body shop had removed the bumper cover, the front fascia, the hood, and the fenders, but they reported that the front of the hood had been crushed rearward, resulting in damage to the hood latch and upward deflection of the middle of the hood. Both hood hinges were bent up and the [20](#) rear edge of the hood had elevated and contacted and cracked the lower-right corner of the windshield. [21](#) There were cracks radiating across the lower section of the windshield from cowl deformation, there [22](#) was a spider-web patterns of cracks in the upper-left section, and [23](#) there were cracks in the middle-right section from internal contact by the deploying dash-mounted airbag cover. [24](#) The sunroof glass was shattered.

[25](#) [26](#) On the left side, the front of the fender was deformed but it was not available for inspection. The left-front wheel rim was bent and the tire was cut impact with the curb, but the left-side wheelbase was not changed. [27](#) [28](#) [29](#) [30](#) [31](#) There was no other damage to the left side of the vehicle.

[32](#) On the right side, the front of the fender was deformed but it was not available for inspection. [33](#) [34](#) The right-front tire was completely deflated from impact with the curb but the wheel was not damaged and there was no change in the right wheelbase. [35](#) The window in the right-rear door was shattered but this does not seem to be related to the frontal collision with the tree. [36](#) [37](#) There was no other damage to the right side of the vehicle and [38](#) [39](#) there was no damage to the rear of the vehicle.

Interior

[40](#) This vehicle was equipped with steering-wheel, dash-mounted, [41](#) and driver knee-bolster frontal-impact airbags, and all of these airbags deployed in the frontal impact with the tree. The vehicle was also equipped with seatback-mounted side-impact airbags and roof-siderail airbags but they did not deploy.

[42](#) In the driver seating area, there was no damage to the deployed steering-wheel or [43](#) knee-bolster airbags. [79](#) There was no evidence of belt use and the seatbelt was completely retracted and taut due to activation of the seatbelt pretensioner. [44](#) [45](#) [46](#) [47](#) [48](#) The lower half of the steering-wheel rim was scuffed and bent slightly forward, the steering column was deflected forward, and there was a scuffmark on the bottom of the steering column. [49](#) [50](#) There was a spider-web pattern of cracks in the upper-left section of the windshield, possibly from contact by the driver's hand. [51](#) [52](#) There were scuffmarks on the upper section of the instrument panel to the left and right sides of the steering wheel. [53](#) The mid section of the instrument panel was buckled, [54](#) the light knob on the left side was broken, [55](#) [56](#) and there was a dent in the left side of the knee bolster at the junction of the mid instrument panel. [57](#) [58](#) There was no other damage in the driver seating area.

[59](#) In the center-front area, the ashtray cover on the vertical console was broken and bent. [60](#) On the center console between the seats, the transmission-selector handle was broken off and its cover was bent to the left. [61](#) There were scuffmarks on the top of the armrest between the seats. [62](#) The rearview mirror was separated from the windshield mount but the mirror glass was intact. There was no other damage in the center-front area.

[63](#) [64](#) In the right-front seating area, there was no damage to the deployed dash-mounted airbag [65](#) but there were bloodstains on the right half of the fabric. [66](#) The left side of the airbag cover was cracked and there was a [67](#) dent in the lower-right corner, possibly where the cover had contacted and cracked the windshield. [81](#) There was no evidence of seatbelt use and the pretensioner was activated with the

seatbelt webbing completely retracted and taut. [68](#) [69](#) The left side of the glove box and the mid instrument panel were dented, and the right side of the vertical console was dented and the plastic was split. [70](#) The right vent outlet was displaced from the panel. [71](#) There was no other damage in the right-front passenger area.

[72](#) [73](#) [74](#) [75](#) In the rear, there were scuffmarks on the backs of both front seatbacks. [76](#) [77](#) There was also a scuffmark on the back of the center armrest between the front seats, and the plastic cover was displaced up.

There were no interior intrusions.

OCCUPANT KINEMATICS AND INJURIES

[78](#) The 175-cm, 77-kg (5-ft 9-in, 170-lb) 25-year-old male driver was not using the three-point belt and the [41](#) [42](#) steering-wheel and knee-bolster airbags deployed during the frontal impact. [79](#) There was no evidence of belt use and the seatbelt was fully retracted and taut due to activation of the pretensioner.

During the frontal impact, the driver moved forward relative to the vehicle interior into the steering-wheel and knee-bolster airbags. His hand may have contacted and cracked the upper-left section of the windshield, and his knees probably contacted the steering column and the left side of the knee bolster, but he did not sustain any injuries.

[80](#) The 178-cm, 82-kg (5-ft 10-in, 181-lb) 24-year-old male right-front passenger was not using the three-point belt and the [64](#) [65](#) dash-mounted airbag deployed during the frontal impact. [81](#) There was no evidence of belt use and the seatbelt was fully retracted and taut due to activation of the pretensioner.

During the frontal impact, the right-front passenger moved forward relative to the vehicle interior, into the deployed dash-mounted airbag and the knee bolster/glove box. He did not sustain any injuries.

[82](#) The 163-cm, 50-kg (5-ft 4-in, 110-lb) 23-year-old female center rear-seat passenger was not using the available three-point belt but she reportedly placed her hands on the backs of the driver and right-front seat to brace when the vehicle departed the road. [72](#) During the frontal impact, she moved forward relative to the vehicle interior between the two front seats and into and over the center armrest. She sustained an oblique fracture to the distal shaft of the right humerus and a comminuted fracture to the mid-distal shaft of the left humerus, reportedly from hand/forearm contact with the backs of the two front seats as her body moved forward between the seats. She also sustained a contusion to the anterior aspect of the left shin from contact with the back of the center armrest between the front seats, [76](#) [77](#) as evidenced by scuffmarks and damage to the back of the armrest.

The following tables and [83](#) [84](#) [85](#) drawings summarize the injuries and injury sources sustained for the three unbelted adult occupants.

Occupant: Driver	Age: 25 years	Gender: Male		
Restraints: Steering-wheel and knee-bolster airbags	Stature: 175 cm (5 ft, 9 in)	Mass: 77 kg (170 lb)		
Injury Description	A.I.S.	Injury Source		
—	—	Definite	Probable	Possible

No injuries	—	—	—	—
Maximum A.I.S. Level	0	—	—	—
Injury Severity Score	0	—	—	—
Blood alcohol level is .11 percent	—	—	—	—

Occupant: Right front	Age: 24 years	Gender: Male		
Restraints: Dash-mounted airbag	Stature: 178 cm (5 ft, 10 in)	Mass: 82 kg (181 lb)		
Injury Description	A.I.S.	Injury Source		
—	—	Definite	Probable	Possible
No injuries	—	—	—	—
Maximum A.I.S. Level	0	—	—	—
Injury Severity Score	0	—	—	—

Occupant: Center rear	Age: 23 years	Gender: Female		
Restraints: None	Stature: 163 cm (5 ft, 4 in)	Mass: 50 kg (110 lb)		
Injury Description	A.I.S.	Injury Source		
—	—	Definite	Probable	Possible
Oblique fracture, distal shaft of the right humerus	2	Right-front seatback (bracing)	—	—
Comminuted fracture, mid-distal shaft of the left humerus	3	Driver seatback (bracing)	—	—
Contusion, anterior aspect of left shin	1	Center armrest between the front seats	—	—
Maximum A.I.S. Level	3	—	—	—
Injury Severity Score	10	—	—	—

CASE NO.: 505

CASE VEHICLE: 1999 Dodge

TYPE: Caravan, 4-door minivan

OCCUPANT: (Driver) 18-year-old female

STATURE: 163 cm (5 ft, 4 in) MASS: 50 kg (110 lb)

RESTRAINTS: 3-point belt; steering-wheel airbag

SEVERITY: MAIS - 1 ISS - 2

CASE NO.: 505

CASE VEHICLE: 1999 Dodge

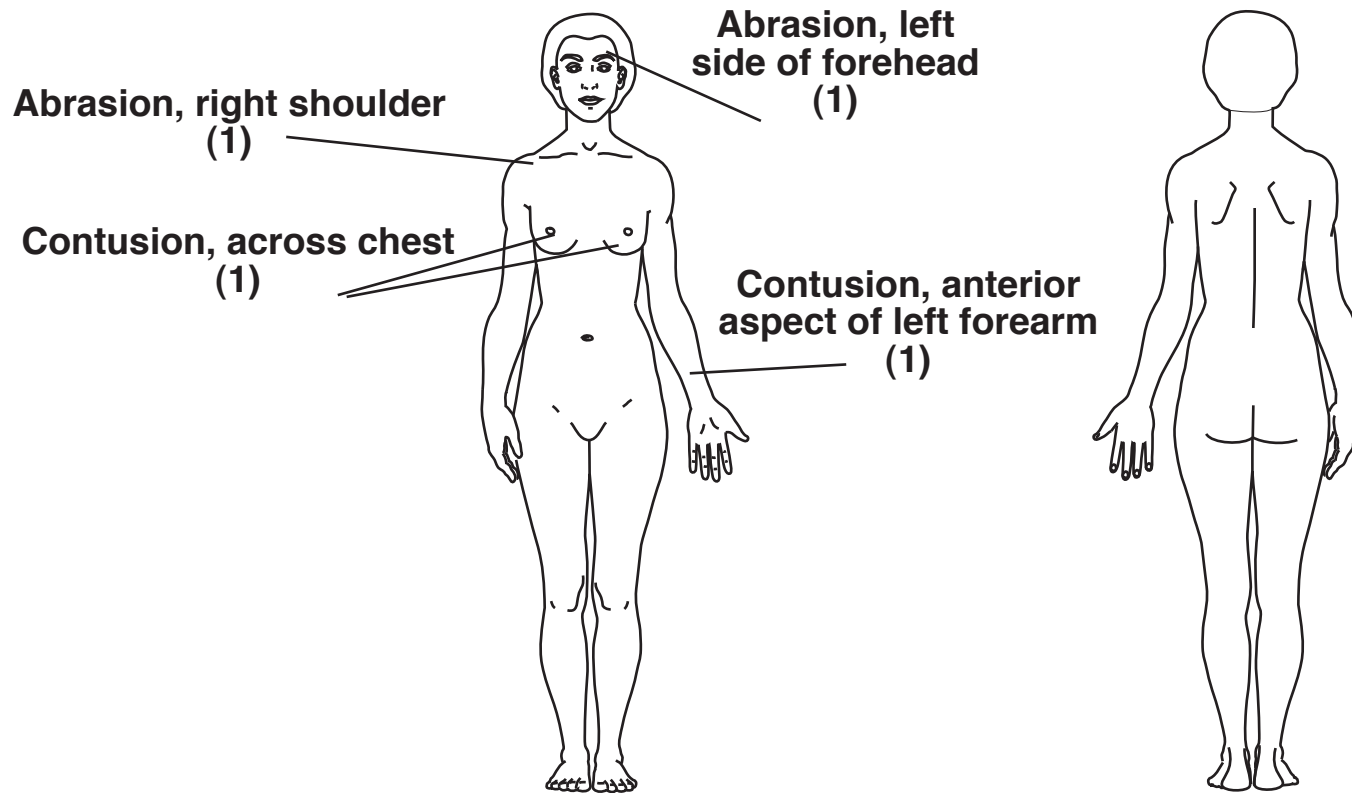

TYPE: Caravan, 4-door minivan

OCCUPANT: (Right front) 57-year-old female

STATURE: 170 cm (5 ft, 7 in) MASS: 57 kg (125 lb)

RESTRAINTS: 3-point belt; dash-mounted airbag

SEVERITY: MAIS - 1 ISS - 1

Case No.: **505**
Case Veh. (A): **1999 Dodge**
Type: **Caravan, 4-door minivan**
Driver: **18-year-old female**

Weather: **Cloudy**
Road Surface: **Dry**
Road Construction: **Asphalt**
Light Condition: **Daylight**
