1.0 PURPOSE OF COMPLIANCE TEST

The purpose of this compliance test was to determine whether the subject vehicle, a 2005 Volkswagen Jetta GLI, meets the performance requirements of FMVSS 401, Interior Trunk Release.

The test was conducted in accordance with the U.S. Department of Transportation, National Highway Traffic Safety Administration's Laboratory Test Procedure TP-401-01.

The test was conducted by NHTSA Office of Vehicle Safety Compliance test engineers on 1/27/2005.

Test Location:
Volkswagen Dealer in Rockville, MD
2.0 TEST PROCEDURE AND DISCUSSION OF RESULTS

Based on the test performed, the Vehicle: 2005 Volkswagen Jetta GLI, NHTSA No. C55602 appeared to meet the requirements of FMVSS 401.

The vehicle was tested by entering the trunk and closing the lid. The release slide lever was easily observed in the darkened, enclosed trunk. A force gauge was attached to the release handle and 3 separate attempts were made to exit the trunk by applying a load to the instrument. For each attempt, the trunk released from the single latching position at a force level of approximately 44.1 newtons (9.9 lbs.) or less.

**FMVSS 401 - MANUAL TRUNK RELEASE OPERATION (continued)**

NOTE: Interior Trunk Release is a totally mechanical system with its operation and functioning not dependent upon engine operation or vehicle speed. The release mechanism will function identical to that of the stationary vehicle with the key in the ignition (as previously tested) and thus the following tests were not required to be conducted.
