SAFETY COMPLIANCE TESTING FOR FMVSS 202a
“Head Restraints”

FORD MOTOR COMPANY
2009 Ford Flex
NHTSA No. C90204

MGA RESEARCH CORPORATION
446 Executive Drive
Troy, Michigan 48083

Test Dates: July 16 and 24, 2009
Report Date: August 17, 2009

FINAL REPORT

Prepared For:

U.S DEPARTMENT OF TRANSPORTATION
National Highway Traffic Safety Administration
Enforcement
Office of Vehicle Safety Compliance (Rm W45-304)
1200 New Jersey Avenue, SE
Washington, DC 20590
This publication is distributed by the U.S. Department of Transportation, National Highway Traffic Safety Administration in the interest of information exchange. The opinions, findings and conclusions expressed in this publication are those of the author(s) and not necessarily those of the Department of Transportation or the National Highway Traffic Safety Administration. The United States Government assumes no liability for its contents or use thereof. If trade or manufacturers' names or products are mentioned, it is only because they are considered essential to the object of the publication and should not be construed as an endorsement. The United States Government does not endorse products or manufacturers.

Prepared By:  
Chris Collins, Project Engineer

Helen A. Kaleto, Laboratory Manager

Approved By:  
P. Michael Miller II, Vice President

9/4/2009

FINAL REPORT ACCEPTANCE BY OVSC:  
Edward E. Chan

Accepted By:  

Acceptance Date:  

MGA File #: G09Q7-004.1

The data recorded indicates that the 2009 Ford Flex tested appears to meet the requirements of FMVSS 202a.

1.0 PURPOSE AND PROCEDURE

Purpose: The purpose of testing was to determine whether head restraints equipped in vehicles supplied by the National Highway Traffic Safety Administration meet the requirements of Federal Motor Vehicle Safety Standard Number 202a, entitled “Head Restraints”.

Test Procedures: The “MGA Research Corporation Testing Procedures for FMVSS 202a, submitted to and approved by the National Highway Transportation Safety Administration, contains the specific procedures used to conduct the testing.

This procedure shall not be interpreted to conflict with any portion of NHTSA TP-202aS-00, FMVSS 202a nor any amendment thereof within the applicable contract.

2.0 DATA SUMMARY

Summary data is provided below. Data for the configuration and the location of seating position tested provided in Section 5.0. Photographs are found in Section 6.0 and test plots are found in Section 7.0. The data recorded indicates that the 2009 Ford Flex tested appears to meet the requirements of FMVSS 202a.

APPROVED BY: **Helen Kaleto**
DATA SHEET 2a

DIMENSIONAL REQUIREMENTS FOR FIXED HEAD RESTRAINTS

VEH. NHTSA NO.: C90204 TEST DATE: July 16th

Seat Location: Passenger 2-Way Manual (Cloth)

**Height Measurement**

SAE J826 three-dimensional manikin torso angle: 21°

Striker to H-Point (mm): NA Striker to H-Point angle: NA

**Height, H (mm):** 837 mm

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
<tbody>
<tr>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Hh > or = 800 mm for front seats.

If the head restraint is less than the required height, check for passage of the 25 mm diameter sphere.

Position the head restraint in the lowest position of vertical adjustment.

**Height, H (mm):** 778 mm

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
<tbody>
<tr>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Hh > or = 750 mm for front seats and rear seats with head restraints.

If the head restraint is less than the required height, check for passage of the 25 mm diameter sphere.

**Width Measurement**

If the manikin is moved between the Height measurement and the Width measurement, re-record the torso angle, striker to H-Point distance and angle.

Position the head restraint in the highest position of vertical adjustment.

Width is measured 65 mm below the measured Height, Hh.

Height, Hw (= H – 65): 772 mm

**Width, W (mm):** 231 mm

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
<tbody>
<tr>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Width must be greater than or equal to 170 mm. If a vehicle has a front center designated seating position the front outboard head restraints must be greater than or equal to 254 mm.
**Backset Measurement (Front Head Restraints Only)**

Position the HRMD and record the following measurements.

HRMD torso angle: 21°

Striker to H-Point (mm): NA  Striker to H-Point angle: NA

<table>
<thead>
<tr>
<th>Backset, B (mm):</th>
<th>0 mm</th>
<th>X</th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
</table>

Backset must be less than or equal to 55 mm.

**Gap Measurement**

Position the head restraint in the lowest position of vertical adjustment.

Number of gaps within the gap measurement zone: 3

Least dimension of each gap (measured with a steel tape): NA

Size of each gap (measured with the spherical head form): NA

**Gap Size** 25 mm Cylinder did not pass through each gap.  X  PASS  FAIL

Gaps must be less than or equal to 60 mm.

**REMARKS:**

RECORDED BY: Chris Collins  DATE: July 24th, 2009

APPROVED BY: Helen Kaleto
DATA SHEET 2b

DIMENSIONAL REQUIREMENTS FOR ADJUSTABLE HEAD RESTRAINTS

VEH. NHTSA NO.: C90204 TEST DATE: July 16th 2009

Seat Location: Driver 6-Way Power (Cloth)

Height Measurement

SAE J826 three-dimensional manikin torso angle: 21°

Striker to H-Point (mm): NA Striker to H-Point angle: NA

Position the head restraint in the highest position of vertical adjustment.

**Height, Hh (mm): 816 mm**

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
</table>

Hh > or = 800 mm for front seats.

If the head restraint is less than the required height, check for passage of the 25 mm diameter sphere.

Position the head restraint in the lowest position of vertical adjustment.

**Height, Hl (mm): 762 mm**

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
</table>

Hl > or = 750 mm for front seats and rear seats with head restraints.

If the head restraint is less than the required height, check for passage of the 25 mm diameter sphere.

Width Measurement

If the manikin is moved between the Height measurement and the Width measurement, re-record the torso angle, striker to H-Point distance and angle.

Position the head restraint in the highest position of vertical adjustment.

Width is measured 65 mm below the measured Height, Hh.

Height, Hw (= Hh – 65): 751 mm

**Width, W (mm): 232 mm**

<table>
<thead>
<tr>
<th></th>
<th>PASS</th>
<th>FAIL</th>
</tr>
</thead>
</table>

Width must be greater than or equal to 170 mm. If a vehicle has a front center designated seating position the front outboard head restraints must be greater than or equal to 254 mm.
Backset Measurement (Front Head Restraints Only)

Position the HRMD and record the following measurements.

HRMD torso angle: 21°

Striker to H-Point (mm): NA  Striker to H-Point angle: NA

Position the head restraint at a height greater than or equal to 750 mm and less than or equal to 800 mm for front head restraints. Exception: head restraint with lowest position higher than 800 mm, adjust to lowest position.

**Backset, B (mm):** 0 mm  \[\text{FAIL}\]  \[\text{PASS}\]  \[\text{X}\]

Backset must be less than or equal to 55 mm.

Gap Measurement

Position the head restraint in the lowest position of vertical adjustment.

Number of gaps within the gap measurement zone: 3

Least dimension of each gap (measured with a steel tape): NA

Size of each gap (as measured with the spherical head form): NA

**Gap Size 25 mm Cylinder did not pass through each gap.**  \[\text{FAIL}\]  \[\text{PASS}\]  \[\text{X}\]

Gaps must be less than or equal to 60 mm.

REMARKS:

RECORDED BY: Chris Collins  DATE: July 24\textsuperscript{th} 2009

APPROVED BY: Helen Kaleto
DATA SHEET 3

OWNER'S MANUAL

VEH. NHTSA NO.: C90204 TEST DATE: July 24th 2009

Emphasize that all occupants should place their head restraint in a proper position prior to operating the vehicle in order to prevent the risk of serious injury.

PASS X FAIL ___

Description of the head restraint system and identification of which seats are equipped.

PASS X FAIL ___

If the head restraint is removable, instructions on how to properly remove and reinstall using a deliberate action distinct from any act necessary for adjustment.

PASS X FAIL ___ N/A ___

Warning that all head restraints must be reinstalled properly to protect occupants.

PASS X FAIL ___

Describe the adjustment of the head restraints and/or seat back to achieve proper head restraint position relative to the head. The description must include the following:

1) a presentation and explanation of the main components of the vehicle’s head restraints

2) the basic requirements for proper head restraint operation, including an explanation of the actions that may affect the proper functioning of the head restraints.

3) the basic requirements for proper positioning of a head restraint in relation to an occupant’s head position, including information regarding the proper positioning of the center of gravity of an occupant’s head in relation to the head restraint.

PASS X FAIL ___

Include copies of relevant pages from the owner’s manual in the final report.

REMARKS:

RECORDED BY: Chris Collins DATE: July 24th 2009

APPROVED BY: Helen Kaleto
DATA SHEET 4

REMOVABILITY

VEH. NHTSA NO.: C90204 TEST DATE: July 24th 2009

Are the head restraints removable? YES __X__ NO

If removable, does removal REQUIRE an action distinct from actions to adjust the head restraint? X YES (PASS) NO (FAIL)

Description of action(s) for head restraint adjustment:

1. Raise the head restraint by pulling up on the head restraint.
2. Lower the head restraint by pressing and holding the guide sleeve adjust/release button and pushing down on the head restraint.

Description of distinct action for removal:

1. Pull up the head restraint until it reaches the highest adjustment position.
2. Simultaneously press and hold both the adjust/release button and the unlock/remove button, and then pull up on the head restraint.

8.0 REPORT OF VEHICLE CONDITION

REPORT OF VEHICLE CONDITION AT THE COMPLETION OF TESTING

CONTRACT No.: DTNH22-06-C-00030/0007 DATE: July 16 and 24, 2009

From: MGA Research Corporation, 446 Executive Drive, Troy, MI 48083

To: NHTSA, OVSC, NVS-220

The following vehicle has been subjected to compliance testing for FMVSS No. 201U & 202a

The vehicle was inspected upon arrival at the laboratory for the test and found to contain all of the equipment listed below. All variances have been reported within 2 working days of vehicle arrival, by letter, to the NHTSA Industrial Property Manager (NAD0-30), with a copy to the OVSC COTR. The vehicle is again inspected, after the above test has been conducted, and all changes are noted below. The final condition of the vehicle is also noted in detail.

VEH. MOD YR/MAKE/MODEL/BODY: 2009 Ford Flex

VEH. NHTSA NO.: C90204 VIN: 2FMDK51C09BA11234

COLOR: Dark Blue

ODOMETER READINGS: ARRIVAL 196 miles Date: 2/12/09

COMPLETION 196 miles Date: 7/24/09

PURCHASE PRICE: $24,961.40 DEALER’S NAME: Soerens Ford

ENGINE DATA: 6 Cylinders 3.5 Liters ___ Cubic Inches

TRANSMISSION DATA: X Automatic ___ Manual ___ No. of Speeds

FINAL DRIVE DATA: ___Rear Drive ___ Front Drive X 4 Wheel Drive

CHECK APPROPRIATE BOXES FOR VEHICLE EQUIPMENT:

TEST LABORATORY: MGA Research Corporation

OBSERVERS: Chris Collins, Helen Kaleto, Dave Maier

REMARKS:

Salvage only.

Equipment that is no longer on the test vehicle as noted on previous pages:

All equipment inventoried and placed in vehicle.

Explanation for equipment removal:

Roof removed and vehicle cut to accommodate test equipment.

Test Vehicle Condition:

Salvage only. Vehicle cut in half to complete testing.

RECORDED BY: Chris Collins, David Maier

DATE: July 24, 2009

APPROVED BY: Helen Kaleto
APPENDIX A
OWNERS MANUAL HEAD RESTRAINTS
Seating and Safety Restraints

SEATING

1 WARNING: Reclining the seatback can cause an occupant to slide under the seat's safety belt, resulting in severe personal injuries in the event of a collision.

1 WARNING: Do not put cargo higher than the seatbacks to reduce the risk of injury in a collision or sudden stop.

1 WARNING: Before returning the seatback to its original position, make sure that cargo or any objects are not trapped behind the seatback. After returning the seatback to its original position, pull on the seatback to ensure that it has fully latched. An unlatched seat may become dangerous in the event of a sudden stop or collision.

Adjustable head restraints

Your vehicle is equipped with front row outboard head restraints that are vertically adjustable.

1 WARNING: To minimize the risk of neck injury in the event of a crash, the driver and passenger occupants should not sit in and/or operate the vehicle until the head restraints are placed in its proper position. The driver should never adjust the head restraint while the vehicle is in motion.

The adjustable head restraints consist of:
- a trimmed energy-absorbing foam and structure (1),
- two steel stems (2),
- a guide sleeve adjust/release button (3),
- and a guide sleeve unlock/removed button (4).

To adjust the head restraint, do the following:
1. Adjust the seatback to an upright driving/riding position. Refer to Adjusting the front manual seat later in this chapter.
2. Raise the head restraint by pulling up on the head restraint.

3. Lower the head restraint by pressing and holding the guide sleeve adjust/release button and pushing down on the head restraint.

Properly adjust the head restraint so that the top of the head restraint is even with the top of your head and positioned as close as possible to the back of your head. For occupants of extremely tall stature, adjust the head restraint to its full up position.

1 WARNING: The adjustable head restraint is a safety device. Whenever possible, it should be installed and properly adjusted when the seat is occupied.
Seating and Safety Restraints

To remove the adjustable head restraint, do the following:
1. Pull up the head restraint until it reaches the highest adjustment position.

2. Simultaneously press and hold both the adjust/release button and the unlock/ remove button, then pull up on the head restraint.

To reinstall the adjustable head restraint, do the following:
1. Insert the two stems into the guide sleeve collars.
2. Push the head restraint down until it locks.

Properly adjust the head restraint so that the top of the head restraint is even with the top of your head and positioned as close as possible to the back of your head. For occupants of extremely tall stature, adjust the head restraint to its full up position.

WARNING: To minimize the risk of neck injury in the event of a crash, head restraints must be installed properly.

Adjusting the front manual seat (if equipped)

WARNING: Never adjust the driver’s seat or head restraint while the vehicle is moving.

WARNING: Always drive and ride with your seatbelt and the lap belt snug and low across the hips.

Lift handle to move seat forward or backward.

Pull lever up to adjust head restraint.

WARNING: Before returning the seatback to its original position, make sure that no children or objects are not trapped behind the seatback. After returning the seatback to its original position, pull on the seatback to ensure that it has latched. An unlatched seat may become dangerous in the event of a sudden stop or collision.
