Final Report of FMVSS 110 Compliance Testing of a 2011 NISSAN LEAF PASSENGER CAR
NHTSA No. CB5200

Grant Farrand, Project Engineer
Debbie Messick, Project Manager

Compliance tests were conducted on the subject 2011 Nissan Leaf 4-door passenger car in accordance with the specifications of the Office of Vehicle Safety Compliance Test Procedure No. TP-110P-03 for the determination of FMVSS 110 compliance.

Test failures identified were as follows:
None

SECTION 1

INTRODUCTION

1.0 PURPOSE OF COMPLIANCE TEST

A 2011 Nissan Leaf, 4-door passenger car was subjected to FMVSS No. 110 testing to determine if the vehicle was in compliance with the requirements of the standard. All tests were conducted in accordance with NHTSA, Office of Vehicle Safety Compliance (OVSC) Laboratory Procedure, TP-110P-03 dated 31 August 2007 and General Testing Laboratories, Inc (GTL) Test Procedure, TP-110-03A dated 13 May 2008.

1.1 TEST VEHICLE

The test vehicle was a 2011 Nissan Leaf 4-door passenger car. Nomenclature applicable to the test vehicle are:

A. Vehicle Identification Number: JN1AZ0CPXBT002457

B. NHTSA No.: CB5200

C. Manufacturer: NISSAN MOTOR CO., LTD.

D. Manufacture Date: 04/11

E. Color: Super Black

1.2 TEST DATE

The test vehicle was subjected to FMVSS No. 110 testing on June 14-15, 2011.
SECTION 2

TEST PROCEDURE AND SUMMARY OF RESULTS

2.0 GENERAL

The 2011 Nissan Leaf 4-door passenger car, NHTSA No. CB5200, was subjected to FMVSS No. 110 testing on June 14-15, 2011.

2.1 TEST PROCEDURE

Prior to test, the test vehicle was inspected for completeness, systems operability and appropriate fuel and liquid levels, i.e., oil and coolant. The vehicle was then photographically documented as required by the DOT/NHTSA and GTL test procedures. Subsequent events included weighing the vehicle to establish delivered curb weight and the distribution of weight on the front and rear axles and each wheel position. The vehicle normal load as well as the maximum load on each wheel were measured. Data from each tire furnished with the vehicle were recorded. The vehicle tire placard was surveyed and photographed. Required dimensional data and other identifying data for the left front and right rear rims were obtained. The contour of the aforementioned rims was documented photographically.

2.2 SUMMARY OF RESULTS

The test vehicle appears to be in compliance with the requirements of FMVSS No. 110.
SECTION 3

TEST DATA
DATA SUMMARY SHEET (1 of 2)

VEHICLE MAKE/MODEL/BODY STYLE: 2011 NISSAN LEAF PASSENGER CAR

VEHICLE NHTSA NO: CB5200 VIN: JN1AZ0CPXBT002457

VEHICLE TYPE: PASSENGER CAR DATE OF MANUFACTURE: 04/11

LABORATORY: GENERAL TESTING LABORATORIES
TEST DATE: June 14-15, 2011

PASSENGER CAR REQUIREMENTS

GENERAL (DATA SHEET 2)

The vehicle must be equipped with tires that meet the requirements of S139. (S110, S4.1)
[ ] Pass

TIRE LOAD LIMITS (DATA SHEET 5)

The vehicle maximum load on the tire is not greater than the maximum load rating as marked on the sidewall of the tire. (S110, S4.2.1.1)
[ ] Pass

The vehicle normal load on the tire is not greater than the value of 94 percent of the load rating at the vehicle manufacturer’s recommended cold inflation pressure for that tire. (S110, S4.2.1.2)
[ ] Pass

PLACARD AND TIRE INFLATION PRESSURE LABEL (DATA SHEETS 4 AND 5)

The placard and tire inflation pressure label (if provided) are affixed and located correctly, and display the information and format required. (S110, S4.3)
[ ] Pass

No inflation pressure other than the maximum permissible inflation pressure may be shown on the placard and, if any, tire inflation pressure label unless as required. (S110, S4.3.4)
[ ] Pass

RIMS (DATA SHEETS 3 AND 6)

Each rim is constructed to the dimensions of a rim referred to in FMVSS 139 that is listed by the manufacturer of the tires as suitable for use with those tires. (S110, S4.4.1(a)).
[ ] Pass
DATA SUMMARY SHEET (2 of 2)

PASSENGER CAR REQUIREMENTS

Vehicle rims retain deflated tires during a controlled braking application (S110, S4.4.1(b)).

____ N/A_____

OWNER’S MANUAL (DATA SHEET 7)

Owner’s manual or other documentation has discussion of Vehicle Placard, Loading and Tires (575.6 (a)(4)).

____ Pass_____

Owner’s manual includes exact statement to “Steps for Determining Correct Load Limits.” (575.6(a)(5))

____ Pass_____

</table>

* Labels are to be affixed to the driver’s side B-pillar otherwise refer to FMVSS 110 requirements.

Labeling Notes:
1. Tire size and pressure can be omitted from Vehicle Placard if same data is displayed on a Tire Inflation Pressure Label.
2. The Alphanumeric Identifier or Barcode, is optional. It can be located vertically, along the right edge or the left edge of the placard or label, or horizontally, along the bottom edge of the placard or label.
3. Tire size can include the tire load range identification symbol(“XL” or “reinforced”, “B”, “C”, “D”, “E”, or “F”), the load index number, and speed rating symbol, located immediately to the right of the tire size designation.
4. The tire “SIZE” heading can be replaced with “ORIGINAL TIRE SIZE” or “ORIGINAL SIZE”
5. The “SPARE” tire heading can be replaced with “SPARE TIRE.”
6. For full size spare tires, the recommended cold tire inflation pressure can be replaced with “SEE ABOVE.”
7. If no spare tire is provided, the word “NONE” is to replace the manufacturer’s cold tire inflation pressure.
Vehicle Placard has the exact color and format as specified in the above Figure 1B and text is in English. (X) Yes ( ) No  
If no, explain:__________________________________________________________

Tire Inflation Pressure Label, if provided, has the exact color and format as specified in the above Figure 2B and text is in English. ( ) Yes ( ) No (X) N/A  
If no, explain:__________________________________________________________

Vehicle Placard and, if provided, Tire Inflation Pressure Label are permanently affixed.  
(X) Yes ( ) No

Vehicle Placard information:

Combined weight of occupants and cargo ___ 390 ___kg ( ___ 860 ___ lbs)  
Seating capacity: Total ___5___ Front ___2___ Rear ___3___  
Is the number of belted seating positions the same as the labeled seating capacity? (X) Yes ( ) No  
If no, explain:__________________________________________________________

Is the tire size and pressure provided? (X) Yes ( ) No  
If no, is the tire size and pressure provided on a Tire Inflation Pressure Label? ( ) Yes ( ) No

Vehicle Placard or Tire Inflation Pressure Label tire information:

Tire size Front 205/55R16 Rear 205/55R16  
Tire Inflation Pressure Front 250KPA (36psi) Rear 250KPA (36psi)  
Are the sizes of the installed tires the same as the sizes of the labeled tires? (X) Yes ( ) No  
If no, explain:__________________________________________________________

Is the labeled cold tire inflation pressure equal to or less than the sidewall labeled maximum cold tire inflation pressure?  
Front axle: (X) Yes ( ) No  Rear axle: (X) Yes ( ) No

<td>D. Description and explanation of adverse safety consequences of overloading on handling and stopping and on tires</td>
<td>YES</td>
</tr>
</tbody>
</table>
The following verbatim statement, in the English language, is provided in the Owner’s Manual.
Reference Part 575.6 (a)(5)  (X)Yes  ( ) No

Steps for Determining Correct Load Limit:

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passenger that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passenger from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the XXX amount equals 1400 lbs and there will be five 150 lb passenger in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. (1400 –750 (5 x 150) = 650 lbs.)
5. Determine the combined weight of the luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.
6. If you vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult the manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

DATA INDICATES COMPLIANCE    PASS/FAIL    PASS

REMARKS: Statement #6 above is not shown in owner’s manual, but manual states “Do not tow a trailer with your vehicle.”

VEHICLE LOADING INFORMATION

WARNING

- It is extremely dangerous to ride in the cargo area inside the vehicle. In a collision, people riding in these areas are more likely to be seriously injured or killed.
- Do not allow people to ride in any area of your vehicle that is not equipped with seats and seat belts.
- Be sure everyone in your vehicle is in a seat and using a seat belt properly.

TERMS

It is important to familiarize yourself with the following terms before loading your vehicle:

- Curb Weight (actual weight of your vehicle) - vehicle weight including: standard and optional equipment, fluids, emergency tools, and spare tire assembly. This weight does not include passengers and cargo.
- GVW (Gross Vehicle Weight) - curb weight plus the combined weight of passengers and cargo.
- GVWR (Gross Vehicle Weight Rating) - maximum total combined weight of the unloaded vehicle, passengers, luggage, hitch, trailer tongue load and any other optional equipment. This information is located on the F.M.V.S.S./C.M.V.S.S. label.
- GAWR (Gross Axle Weight Rating) - maximum weight (load) limit specified for the front or rear axle. This information is located on the F.M.V.S.S./C.M.V.S.S. label.
- GCWR (Gross Combined Weight Rating) - The maximum total weight rating of the vehicle, passengers, cargo, and trailer.
- Vehicle Capacity Weight, Load limit, Total load capacity - maximum total weight limit specified of the load (passengers and cargo) for the vehicle. This is the maximum combined weight of occupants and cargo that can be loaded into the vehicle. If the vehicle is used to tow a trailer, the trailer tongue weight must be included as part of the cargo load. This information is located on the Tire and Loading Information label.
- Cargo capacity - permissible weight of cargo, the subtracted weight of occupants from the load limit.

VEHICLE LOAD CAPACITY

Do not exceed the load limit of your vehicle shown as "The combined weight of occupants and cargo" on the Tire and Loading Information label. Do not exceed the number of occupants shown as "Seating Capacity" on the Tire and Loading Information label.

To get "the combined weight of occupants and cargo", add the weight of all occupants, then add the total luggage weight. Examples are shown in the following illustration.
Steps for determining correct load limit

1. Locate the statement "The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs" on your vehicle's placard.

2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.

3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the XXX amount equals 1400 lbs and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. (1400 - 750 lb x 5 = 650 lbs) or (640 - 340 lb x 70 lb = 300 lbs).

5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.

Before driving a loaded vehicle, confirm that you do not exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR) for your vehicle. (See "Measurement of weights" later in this section.)

Also check tires for proper inflation pressures. See the Tire and Loading Information label.

**WARNING**

- Properly secure all cargo with ropes or straps to help prevent it from sliding or shifting. Do not place cargo higher than the seatbacks. In a sudden stop or collision, unsecured cargo could cause personal injury.

- The child restraint top tether strap may be damaged by contact with items in the cargo area. Secure any items in the cargo area. Secure your child could be seriously injured or killed in a collision if the top tether strap is damaged.

- Do not load your vehicle any heavier than the GVWR or the maximum front and rear GAWRs. If you do, parts of your vehicle can break, tire damage could occur, or it can change the way your vehicle handles. This could result in loss of control and cause personal injury.
LOADING TIPS

- The GVW must not exceed the GVWR or GAWR as specified on the F.M.V.S. S./C.M.V.S.S. certification label.
- Do not load the front and rear axle to the GAWR. Doing so will exceed the GVWR.

⚠️ WARNING

- Properly secure all cargo with ropes or straps to help prevent it from sliding or shifting. Do not place cargo higher than the seatbacks. In a sudden stop or collision, unsecured cargo could cause personal injury.
- Do not load your vehicle any heavier than the GVWR or the maximum front and rear GAWRs. If you do, parts of your vehicle can break, tire damage could occur, or it can change the way your vehicle handles. This could result in loss of control and cause personal injury.
- Overloading not only can shorten the life of your vehicle and the tire, but can cause unsafe vehicle handling and longer braking distances. This may cause a premature tire failure, which could result in a serious accident and personal injury. Failures caused by overloading are not covered by the vehicle’s warranty.

MEASUREMENT OF WEIGHTS

Secure loose items to prevent weight shifts that could affect the balance of your vehicle. When the vehicle is loaded, drive to a scale and weigh the front and the rear wheels separately to determine axle loads. Individual axle loads should not exceed either of the Gross Axle Weight Ratings (GAWR). The total of the axle loads should not exceed the Gross Vehicle Weight Rating (GVWR). These ratings are given on the vehicle certification label. If weight ratings are exceeded, move or remove items to bring all weights below the ratings.

TOWING A TRAILER

Do not tow a trailer with your vehicle.
