

New Performance Parts Now Available at Summit Racing Equipment

Summit Racing now carries Classic Performance Pro Touring Suspension Kits, a Summit Racing brand 500 cfm four-barrel carburetor, and Summit Racing brand Electronic Distributors for Chrysler V8 engines.

Tallmadge, OH ([PRWEB](#)) June 24, 2016 -- Summit Racing now carries Classic Performance Pro Touring Suspension Kits, a Summit Racing brand 500 cfm four-barrel carburetor, and Summit Racing brand Electronic Distributors for Chrysler V8 engines.

[Classic Performance Pro Touring Suspension Kits](#)

These bolt-on kits take the slop out of a GM musclecar's factory suspension, improving steering and handling without upsetting ride comfort. Summit Racing carries four stages of Classic Performance Pro Touring kits, all of which include shocks, sway bars, and rear leaf springs.

There are cases where even a 650 cfm carburetor is too big—think six cylinder engines, stock V8s, and small cubic inch street V8s. That's why Summit Racing has developed a 500 cfm version of its M2008 Series four-barrel carburetor. Like its larger cousins, the squarebore vacuum secondary carburetor provides great throttle response and performance in a bolt-on-and-go package.

[Summit Racing Mopar Electronic Distributors](#)

Chrysler was the first Detroit automaker to make electronic ignition standard back in the early 1970s. Summit Racing Mopar Electronic Distributors are perfect for updating small and big block Chrysler V8s that still have points-style distributors. The distributors are available individually or with an ignition box, coil, ballast, and wiring.
