

New at Summit Racing Equipment: KC HiLiTES Gravity Series LED Lights

Summit Racing now carries KC HiLiTES Gravity Series LED Lights. At the heart of each light is the patented Gravity Reflective Diode that combines LED durability and efficiency with precision-machined optical reflectors, delivering maximum long-distance light output in a wide array of precise beam patterns.

Tallmadge, OH ([PRWEB](#)) July 06, 2016 -- Summit Racing now carries [KC HiLiTES Gravity Series LED Lights](#). At the heart of each light is the patented Gravity Reflective Diode that combines LED durability and efficiency with precision-machined optical reflectors, delivering maximum long-distance light output in a wide array of precise beam patterns.

Gravity Series LED lights come in several configurations:

The Gravity LED Daylighter lights have the LEDs housed in rugged shells that bolt directly to a flat surface using a single drilled hole. These lights are sold individually or in kits that include a pair of lights, the famous “Daylighter” light covers, and a wiring harness.

Gravity LED Pro6 Light Bars deliver plenty of light to illuminate a dark trail. The bars are customizable using a clever linking system to give off roaders the ability to build a bar to their precise light/size requirements. The light bars include mounting hardware and a wiring harness.

For vehicles equipped with fog light receptacles or bumpers with auxiliary light tabs, Gravity LED Pro6 Single Mount Lights are a smart retrofit. The lights include a mounting bolt and come with a wiring harness and switch.

Gravity LED Driving Lights are for vehicles that see more highway than dirt. The lights are available with round or rectangular housings that fit most existing fog light mounting locations. The lights have an integrated mounting tab/bracket and are available individually or in kits that include a pair of lights and a wiring harness.

KC HiLiTES makes handy Gravity Inserts that fit directly into existing Daylighter or Pro Sport halogen light housings. Simply connect the wires into the existing wire harness and swap the lens assembly into the housing for a quick, easy LED upgrade.

Summit Racing also carries application-specific KC HiLiTES Gravity Lights for popular vehicles like the Jeep Wrangler JK and Ford F-150/Raptor.
