

## **New at Summit Racing Equipment: McLeod Clutch Kits for Sport Compacts**

*Summit Racing now carries McLeod Clutch Kits for Sport Compacts. They are made for modified vehicles making more horsepower than stock, providing excellent holding power and smooth engagement.*

Tallmadge, OH ([PRWEB](#)) July 08, 2016 -- Summit Racing now carries [McLeod Clutch Kits for Sport Compacts](#). They are made for modified vehicles making more horsepower than stock, providing excellent holding power and smooth engagement.

McLeod's Street Elite Clutch Kits are a smart upgrade for modified engines making 50-70% more horsepower over stock. The Street Elite kits come with a high-clamp load pressure plate and sprung hub carbon/organic disc. This combo allows for a good mix of holding power and smooth engagement—suitable for street driven cars that see occasional track use.

On vehicles with more significant performance upgrades, McLeod recommends its Street Supreme Clutch Kits. The kits feature a six puck carbonic clutch disc and a high clamp load pressure plate. Supreme Kits retain a smooth pedal engagement, while ensuring plenty of holding strength on highly modified engines.

Street Elite and Street Supreme clutch kits are part of McLeod's Supremacy Clutch Systems. Each kit includes a pressure plate and clutch disc, plus a pilot tool and (if applicable) a new throwout bearing. Popular vehicle applications include:

- 1990-2010 Honda Civic
- 2004-11 Mazda RX-8
- 2003-06 Mitsubishi Lancer Evolution
- 1990-2012 Mitsubishi Eclipse
- 2003-06 Nissan 350Z
- 2004 Subaru WRX STI
