

Summit Racing Equipment Introduces EFI Tuning Guide DVDs for Late Model GM and Ford: Unlock More Horsepower and Performance

Summit Racing Equipment's new EFI Tuning Guide DVDs are advanced how-to videos that can help owners of GM and Ford musclecars and trucks unleash hidden horsepower.

Tallmadge, OH ([PRWEB](#)) January 08, 2012 -- In this new series of three DVDs Greg Banish, one of the foremost experts in EFI tuning, guides viewers through the ins and outs of components, software, and proper system calibration.

WHAT THEY ARE: Summit Racing EFI Tuning Guide DVDs

WHY THEY'RE COOL: EFI tuning how-to in the comfort of your living room

GM EFI Tuning Beginners Guide DVD ([SME-DVD-1](#))

Greg shows the correct, step-by-step way to properly tune a GM EFI-equipped vehicle. Topics covered include EFI tuning, fuel injection tables, Mass Airflow sensors, volumetric efficiency, and tips on using HP Tuners and EFI Live software.

GM EFI Tuning Advanced Guide DVD ([SME-DVD-2](#))

This DVD picks up where the Beginners Guide left off. Learn how to properly dial in large flow-rate injectors, make over 600 horsepower using OEM control systems, and use the newer "Virtual VE" airflow models and electronic throttle control systems without sacrificing safety or functionality.

Ford EFI Tuning Advanced Guide DVD ([SME-DVD-3](#))

Follow along as Greg Banish walks through the calibration of a supercharged 4.6L 3v Mustang GT and dispels some of the common tuning myths. Learn how to control the ETC (electronic throttle control) system on a modified engine while retaining the factory equipped safety checks. Other topics include electronic returnless fuel pump controls and variable camshaft systems.

WHERE TO GET THEM: Order online at [SummitRacing.com](#) or call Summit Racing at 1-800-230-3030.
