Alaska Department of Transportation and Public Facilities Chooses AgileAssets for Infrastructure Asset Management

Alaska DOT&PF to replace legacy systems with AgileAssets integrated enterprise solution to help minimize life-cycle costs associated with managing and maintaining their over $6.3 billion in transportation assets.

Austin, Texas ([PRWEB](#)) July 18, 2016 -- AgileAssets Inc. announced today that Alaska Department of Transportation & Public Facilities (Alaska DOT&PF) selected AgileAssets Infrastructure Asset Management Solutions to better manage their diverse portfolio of roads, bridges, equipment, fleet vehicles, and other transportation assets valued at over $6.3 billion.

Alaska DOT&PF will be replacing their legacy systems with AgileAssets integrated enterprise solution to help them minimize the life-cycle costs associated with managing and maintaining their transportation assets, and to increase staff efficiency through data integration across the Department.

"Implementing new efficiencies to improve transportation across Alaska is an endless goal at the Alaska Department of Transportation and Public Facilities. Improving the department's capability to manage its assets is one example of how we can control costs and deliver better service to Alaskans," said Alaska DOT&PF Commissioner Marc Luiken.

"Alaska DOT&PF and its staff have a tremendous responsibility to the people of Alaska to ensure a safe and efficient statewide transportation network that supports the state's economy and provides access to explore and develop its vast resources," says Stuart Hudson, founder and CEO of AgileAssets. "Through AgileAssets' software, Alaska DOT&PF will be able to maximize the value and safety of their public infrastructure, while making the most of the limited resources available to the department."

Under the agreement, Alaska DOT&PF licensed:
• [AgileAssets® Maintenance Manager™](#) - enables decision makers to analyze the effects of various annual maintenance plans and budget scenarios, and to efficiently issue, track, and report on work orders.
• [AgileAssets® Pavement Analyst™](#) - allows pavement engineers to analyze and make data-driven decisions regarding the lifecycle planning of large road networks.
• [AgileAssets® Fleet and Equipment Manager™](#) - helps agencies keep track, summarize, report and optimize all activities required throughout the life cycle of cars, trucks and heavy machinery.
• [AgileAssets® Foundation™](#) - provides base system-wide functionality including GIS/LRS, reporting, security, system administration and more.

About AgileAssets
AgileAssets Inc. is a leading global provider of integrated infrastructure asset management software solutions in use by 22 state departments of transportation across the US and in 13 countries. AgileAssets' proven solutions enable a systematic process for the complete life cycle management of infrastructure assets, including optimization of the decision making process, which allows our clients to more effectively allocate funding and to achieve the highest possible ROI.
