

New at Summit Racing Equipment: Flowmaster American Thunder Exhaust System for Jeep Wrangler JK

Summit Racing now carries Flowmaster's American Thunder Exhaust System for late model Jeep Wrangler JK. The exhaust system tucks the muffler and tubing closer to the JK's chassis, keeping the exhaust safe from trail obstacles as well as providing a more aggressive exhaust rumble.

Tallmadge, OH ([PRWEB](#)) August 04, 2016 -- Summit Racing now carries [Flowmaster's American Thunder Exhaust System](#) for late model Jeep Wrangler JK. The exhaust system tucks the muffler and tubing closer to the JK's chassis, keeping the exhaust safe from trail obstacles as well as providing a more aggressive exhaust rumble.

The American Thunder exhaust system is a cat-back kit that uses 2.5 inch stainless steel tubing finished with a three inch stainless steel tip. The system provides extra ground clearance by relocating the Flowmaster compact Super HR-2 muffler closer to the catalytic converter.

The American Thunder Systems for Wrangler JK are compatible with both two- and four-door Wrangler Unlimited models. Because of the new exhaust routing, Flowmaster strongly recommends an aftermarket rear bumper.

Get a closer look at the system in this [video](#).

Flowmaster American Thunder exhaust systems are made in the U.S.A. and covered by a limited lifetime warranty. All required hardware and brackets are included. Summit Racing offers a similar American Thunder kit for the 1993-95 Jeep Grand Cherokee 5.2L.
