

InventHelp Inventors Develop Toy Car Carrier (SNK-319)

InventHelp, founded in 1984 in Pittsburgh, is submitting HARRIS AUTO TRANSPORT to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) August 13, 2016 -- "We wanted a fun children's toy that would help them with understanding the mechanics and hydraulics of car carriers," said one of two inventors from Milpitas, Calif. "My entire life involved hauling cars all over the nation, and I know that many children would find it fascinating."

They created a prototype for the patent-pending HARRIS AUTO TRANSPORT to enable children to simulate the daily activities of a car carrier. The toy teaches children about how a car carrier works. IT offers hours of fun and entertainment, and promotes imagination and creativity. In addition, the toy features numerous interactive, moving parts and also has durable construction.

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SNK-319, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
