

Navigation Aid for School Buses Invented by InventHelp Client (JMC-1815)

InventHelp, based in Pittsburgh, Pa., is submitting the GPS FOR TRANSPORT VEHICLES to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) August 19, 2016 -- As a bus driver for over 17 years, an inventor from Clinton, N.Y., has observed other drivers complaining about trying to drive and look at papers and having to look out for children at stops, so she designed a system that makes the entire process of bus driving easier.

Versatile, easy to use and compact, the GPS FOR TRANSPORT VEHICLES facilitates the process of driving a school bus or other public-transportation vehicle. It avoids getting lost, lateness, risky driving and stress. Overall, it optimizes orientation, quality service, safety and peace of mind.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-JMC-1815, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
