

## **InventHelp Inventor Develops Improved Motorcycle-Helmet Technology (ORD-2232)**

*A leading invention firm, InventHelp is submitting the ONWARD VIEW to companies for their possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) November 04, 2016 -- "I wanted a motorcycle helmet screen that would be comfortable to wear day or night," said an inventor from Palm Bay, Fla. "Now I have protection from the sunlight during the day while also retaining the ability to see clearly while riding at night. It is a win-win solution."

He developed the ONWARD VIEW to ensure that the rider has full protection from sunlight during daylight hours. The design enables the rider to see the road ahead more safely. It also eliminates the need to take the eyes off the road in order to read the instrument panel. All of this helps the rider focus on maneuvering the motorcycle. Ultimately, it is designed to improve rider safety.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ORD-2232, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
