

## **InventHelp Client's Invention Facilitates the Tracking of Exact Bus Schedules (PIT-320)**

*InventHelp, a leading invention firm, is submitting the EZ BUS LOCATOR to companies for their possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) November 04, 2016 -- An inventor from Wheeling, W.V., knows the frustration of not knowing when one's bus will get to the stop. "When my mother would take the bus she'd call me and ask what time a certain bus was coming, and I would have to call the bus company, check its schedule and call my mother back to let her know the exact time of arrival," he said. "This inspired me to design a quicker and more efficient way to determine bus arrivals."

Suitable for all bus commuters, especially elderly ones, the EZ BUS LOCATOR enables a person to keep track of bus arrival times. This avoids the need for guesswork, and, most important, prevents undue exposure to the elements. It also promotes safety when catching a bus in bad areas.

Featuring a compact, easy-to-use design, it serves as a more reliable alternative to conventional bus schedules, and it can be produced in design variations.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-PIT-320, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
