

Grill or Tool Box Support Base Invented for Trucks and Campers - Designed by InventHelp Client (DLL-3138)

Founded in 1984 in Pittsburgh, InventHelp is submitting the TAILGATE ADVENTURES to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) May 25, 2017 -- Since outdoor cooking and tailgate parties are synonymous, having a barbecue grill on hand for such celebrations is essential. Until now, however, someone had to transport and unload the grill. Thanks to the creativity of an inventor from Muleshoe, Texas, that is no longer necessary.

He developed a prototype for TAILGATE ADVENTURES to eliminate the need to unload heavy grills for tailgate cooking. As such, it keeps the grill easily accessible yet out of the way. It can also be used to transport and store tools. As a result, it makes camping and tailgating easier and more enjoyable. Also, this durable invention is built for years of effective use. In addition, it is convenient, practical, and affordably priced.

The inventor's personal experience inspired the idea. "I originally wanted to build this unit to hold a tool box in the back of a pickup truck," he said, "but realized this invention could also be used to support a grill and burner in a truck or a fifth-wheel camper for outdoor cooking at tailgate parties."

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DLL-3138, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
