

## **R.P.G. Helps Semitruck and RV Drivers Reverse Properly and Safely - Designed by InventHelp Client (MSC-614)**

*A leading inventor service firm, InventHelp is submitting the R.P.G. to appropriate companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 09, 2015 -- "As a semitruck driver I know how difficult it can be for both experiences and new drivers to back up in a straight line," said an inventor from Memphis, Tenn. "In order to solve this common problem I conceived of reliable aid that can be taken everywhere."

The R.P.G. aids a semitruck or RV driver in backing up properly and safely. This avoids accidents and damages. It also eliminates the need for trial-and-error, which saves time and effort. Portable, durable and easy to use, it's suitable for all semitruck or RV drivers, especially beginners.

The original design was submitted to the Memphis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MSC-614, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
