

Accessory Improves Safety for Cyclists and Motorcyclists (SAV-173)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Life Lights-Glo-Potts, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 03, 2017 -- PITTSBURGH...An inventor from Jacksonville, Fla., has considered the many injurious and fatal accidents involving cyclists, motorcyclists and other drivers who must wear helmets, all over the world. "I decided that there should be a solution to this problem," he said.

The patent-pending LIFE LIGHTS-GLO-POTTS is an accessory that provides more safety for a cyclist or motorcyclist on the road. It makes signaling and stopping more obvious to other drivers, which helps prevent injurious or fatal accidents. Overall, it promotes peace of mind.

Compact, easy to use and producible in design variations, the accessory also can be used by skiers, snowboarders, skateboarders, hunters and other outdoors enthusiasts.

The original design was submitted to the Savannah office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SAV-173, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
