

## **Roberts Toyota responds to the COVID-19 crisis with proactive measurements and additional services**

*Columbia area drivers can make use of special at-home services from Roberts Toyota during the COVID-19 crisis*

COLUMBIA, Tenn. ([PRWEB](#)) April 03, 2020 -- Roberts Toyota, a Toyota dealership located in Columbia, is responding to the COVID-19 crisis with proactive measurements and additional available at-home services for its customers. The dealership has provided a message to its customers on its website's homepage. Customers who would like to read that message should visit the website, [robertstoyota.com](http://robertstoyota.com).

The at-home services currently available at Roberts Toyota include home delivery for vehicle purchases, home delivery for vehicle parts, at-home pick-up and delivery of vehicles that need maintenance, and at-home consultation and services for purchasing a new vehicle from home. These services are all aimed to help customers who are unable to leave their homes at this time. The services are available to any customer who does not wish to visit the dealership in person.

Pick-up and drop-off of vehicles that need maintenance is a great service that allows customers to get their vehicles fixed without leaving home. For customers who are stuck at home or self-quarantining, this service is a great option for saving time and effort. The dealership's service center is still open for business for customers who wish to bring their vehicles in person for maintenance.

For customers who decide to visit the dealership facilities during the COVID-19 crisis, Roberts Toyota is taking proactive measurements to disinfect every part of its facilities. Cleaning and disinfecting procedures are even more frequent than usual.

Roberts Toyota encourages its customers to review additional information and guidelines from [the CDC](#) and [the World Health Organization](#).
