

# Missouri Traffic Crashes

**2007  
Edition**  
**2006  
Statistics**

**Department of Public Safety  
Missouri State Highway Patrol**

## Introduction

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in the traffic accident problem in Missouri. It contains information which provides for a comprehensive look at the Statewide accident problems as experienced in 2006.

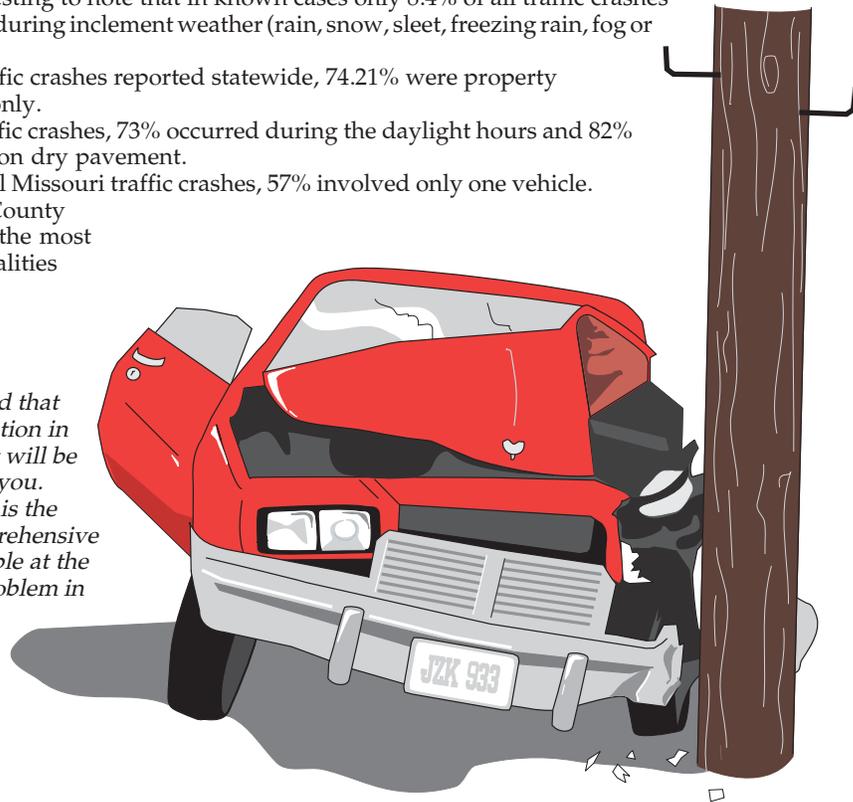

The Missouri State Highway Patrol is the central traffic accident data collection agency for the State of Missouri. Data on both rural and urban traffic crashes is made available to this agency. Law enforcement agencies throughout the State provide the Highway Patrol with copies of their accident reports. All reports of traffic accidents including those investigated by the Missouri State Highway Patrol are tabulated and analyzed by this agency. It is thus due, in part, to the continued cooperation of these law enforcement agencies that a meaningful picture of the statewide accident experience is available to interested persons.

## Interesting Statistics

*Here at a glance are some interesting statistics found in this booklet:*

- In 2006 there were 1,096 persons killed in traffic accidents in the State of Missouri, 161 (12.8%) less than in 2005. There was a decrease of about 4.55% in total accidents statewide compared to 2005.
- Speed and too fast for conditions were the lead Probable Contributing Circumstances in fatal accidents. Of all fatal accidents, 29% involved drinking/drugs.
- Of all persons killed in Missouri traffic crashes in 2006, 498 (45.68%) were in the 16-35 age group. The age group most overrepresented in Missouri fatal traffic crashes is 16-20 (184 killed - 16.88% of the total).
- It is interesting to note that in known cases only 8.4% of all traffic crashes occurred during inclement weather (rain, snow, sleet, freezing rain, fog or mist).
- Of all traffic crashes reported statewide, 74.21% were property damage only.
- Of all traffic crashes, 73% occurred during the daylight hours and 82% occurred on dry pavement.
- Of all fatal Missouri traffic crashes, 57% involved only one vehicle.
- Jackson County recorded the most traffic fatalities with 82.

*It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at the accident problem in Missouri.*

\*Updated 1996 Licensed Drivers 3,797,574

<sup>1</sup> Number of deaths per 100 million miles of vehicle travel.

<sup>2</sup> Number of deaths and injuries per 100 million miles of vehicle travel.

<sup>3</sup> The 1995 cost figures have been calculated using a different National Safety Council cost estimate formula. The 1993 and 1994 cost figures also have been

recomputed using this formula. As a result, the 1993 and 1994 costs displayed in this publication are

different than those previously published. 1993 - 1995 costs are not comparable to prior years since

different cost formulas were utilized.

Total .....	1,096	62,078	63,174	100.00

Note: The type of accident is determined by the first harmful event.

# Statewide Traffic Deaths by County

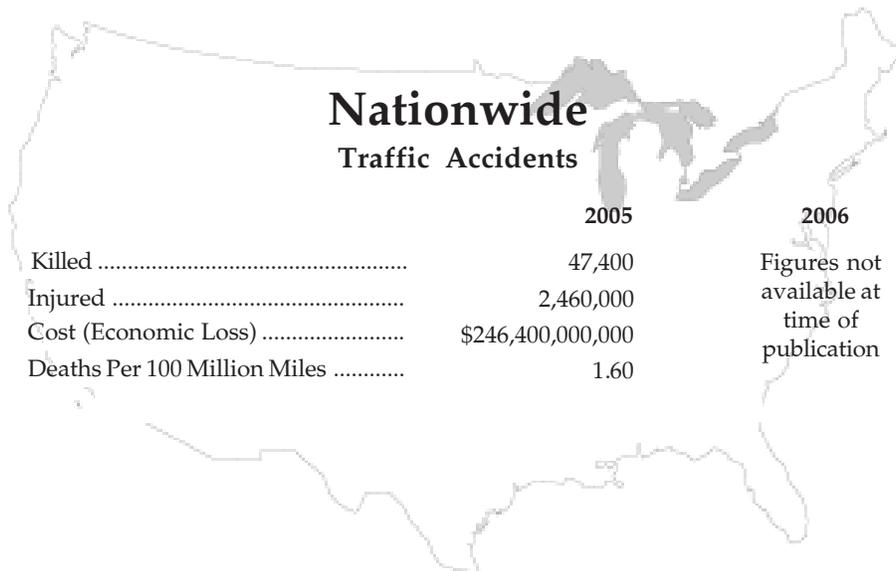

**Statewide Traffic Deaths by County** - The numbers on this map include both rural and urban traffic deaths for each county and the City of St. Louis. The City of St. Louis is carried separately because it is not located within a county.

The first figure in each county represents the total deaths during 2006. The second figure (the figure with the decimal point) represents the average deaths per year for the last ten years. By removing the decimal point, the number represents the total deaths for a 10-year period. The third figure indicates the increase or decrease of traffic fatalities in each county from the year 2005 to 2006. If there is no change it will be indicated by a -0-.

*For example: Atchison, the topmost, western county, shows 1 person was killed last year. There has been an average of 2.4 people killed each year for the last 10 years or a total of 24 over the 10-year period.*

Total	2,560	553	213	572	1,500	2,364	98

**Drinking and Accidents** (Includes drivers of all vehicles and pedestrians) - Whether or not a person has been drinking cannot always be determined at the scene of an accident. It is generally impossible to determine the persons who have had one or a few drinks; yet, these individuals may be as much of a hazard as the obvious drunk. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his condition may never be determined.

Persons Killed in Alcohol Related Accidents ..... 273  
 Persons Injured in Alcohol Related Accidents ..... 5,173

**Fatal Traffic Crashes:**  
 Drinking Involved ..... 240  
 No Drinking Involved ..... 717  
 Information Not Known ..... 14

**All Traffic Crashes:**  
 Drinking Involved ..... 7,947  
 No Drinking Involved ..... 154,467  
 Information Not Known ..... 4,729

***In Known Cases:***

- 4.89 out of every 100 traffic crashes in the State involved drinking.
- In rural accidents, 7.65 out of every 100 traffic accidents involved drinking.
- 25.08 out of every 100 fatal accidents involved drinking.
